Alaska Aerospace Corporation and Moonshot Space Sign Memorandum of Understanding at 41st Space Symposium

Body:

Colorado Springs, CO — Alaska Aerospace Corporation (AAC) and Moonshot Space have entered into a partnership to advance innovative access to space from Alaska. At the 41st Space Symposium, AAC and Moonshot Space signed a Memorandum of Understanding (MOU) that will keep Alaska at the forefront of space launch.

Moonshot Space is developing an electromagnetic launch system for small- and medium-class orbital payloads. Through this collaboration, AAC and Moonshot Space will evaluate opportunities to support testing and future operations of their system in Alaska, leveraging the state's unique geographic advantages.

“This agreement reflects AAC’s commitment to pioneer innovation in the Last Frontier,” said John Oberst, CEO of Alaska Aerospace Corporation. “We are working to align infrastructure, partnerships, and regulatory pathways to support next-generation space access with visionary companies like Moonshot Space.”

“We, at Moonshot Space, are very excited about this partnership that will bring to life a brand new way to deliver payloads to space.” said Fred Simon CTO & co-founder of Moonshot Space.

“Our vision is extremely brave and having Alaska Aerospace embrace it, is not taken for granted.” said Shahar Bahiri COO & co-founder of Moonshot Space.

The MOU represents an initial step toward collaboration, with both organizations planning to further evaluate technical, regulatory, and operational considerations in the months ahead.

About Alaska Aerospace Corporation (AAC):

AAC is a state-owned corporation established to develop and expand Alaska’s aerospace sector by providing launch services and supporting infrastructure for commercial, government, and scientific missions. AAC currently owns and operates the Pacific Spaceport Complex – Alaska on Kodiak Island. AAC is working with the University of Alaska Fairbanks to license and expand operations at the Poker Flat Research Range.

About Moonshot Space:

Moonshot Space is an emerging aerospace company developing next-generation launch technologies, including electromagnetic launch systems designed to enable new methods of delivering payloads to space.
