## Black History Month

The programs below are two of several airing during February in celebration of Black History Month.

## Pullman and the Railroad Rebellion: American Stories

In 1864, the powerful industrialist and engineer George Pullman brought luxury to overnight train travel with his revolutionary sleeping cars. Passengers aboard these rail cars were served by former slaves who became known as Pullman Porters and Maids.

Pullman soon established a company town for employees on Chicago's South Side, giving him complete autonomy over every aspect of their lives. This program recounts the bloody rebellion that followed as Pullman's workers fought for their independence.

**Fri 2nd 10pm (3-2)**

**Tue 6th 10pm (3-2)**

**Mon 19th 8pm (3-1)**

## Shuttlesworth

Rev. Fred Shuttlesworth was raised in the crucible of segregated Birmingham, but he was forged by its attempt to kill him. When the KKK planted a bomb underneath his bed and he emerged unharmed, he was sure he was saved by God to lead a movement. His work not only ended legal segregation, but led directly to the Civil and Voting Rights Acts—and inspired freedom movements around the world.

## AMERICAN EXPERIENCE

### Fly with Me

“Fly with Me” is the story of how the first female flight attendants in the 1960s were at the leading edge of women’s rights, changing gender norms and equal opportunity in the workplace law.

The two-hour episode is about both exploitation and activism, and pitched battles within the courtrooms of the United States.

Maligned as feminist sellouts and sluts, stewardesses, as they were called, knew different. Firsthand witness accounts, personal stories, and a rich archive tell a lively, fun, and important but neglected history of the women who, while flying the world, changed it.

## NOVA

### Hunt for the Oldest DNA

Nova follows the dramatic quest to recover DNA millions of years old and reveal a lost world from before the last Ice Age.

The 2 million-year-old DNA, retrieved from sediment cores at the northern edge of Greenland, reveals stunning information about the plants and long-extinct creatures that once inhabited the area: a blend of Arctic and temperate species unlike anything that exists today.

Some 2 million years ago, the high Arctic was a much warmer, greener place—greener than many places on Earth are today. Paleontologists have found evidence of lush forests home to bears, beavers, and camel-like creatures in extreme northern latitudes.
