### **Save Our Water Requests Public Meeting with DOJ on upcoming PFAS Settlement**

Save Our Water (S.O.H2O) is calling for a public meeting with the Department of Justice (DOJ) to explain the terms of a lawsuit settlement with Johnson Controls/Tyco for the PFAS contamination they caused in the Marinette and Peshtigo area.

“We have asked our State Representative Jeff Mursau, and State Senator Mary Felzkowski, to facilitate a public meeting with the DOJ in the Marinette area to explain the impact of this settlement. We stood with the Attorney General when he announced the lawsuit and we are requesting someone from the DOJ be here to explain it to our communities when they bring this lawsuit to a close,” stated S.O.H2O President Jeff Lamont.

S.O.H2O is a local charitable organization formed after the discovery of the PFAS contamination in local drinking water wells, groundwater, and in the bay of Green Bay.
