MOTHERS, INFANTS, & NAS

IMPROVING OUTCOMES FOR MOTHERS & INFANTS AFFECTED BY SUBSTANCE USE DISORDER, ESPECIALLY OPIOIDS

Missouri's Telehealth Network and the Missouri Hospital Association have created a Mothers, Infants & NAS (Neonatal Abstinence Syndrome) ECHO. Participants will learn about evidence-based practices, collaboration, innovation and enhanced support systems. An interdisciplinary team of experts will help clinicians develop advanced skills and best practices that improve health care access, quality and efficiency. Interactive, online sessions occur **every 1st and 3rd Thursday of the month from 12:00 to 1:00 pm CST.**

PARTICIPANTS WILL BE ABLE TO:

- Effectively evaluate validated screening tools to screen for perinatal substance use disorder among pregnant and postpartum people.
- Describe the components and the advantages of the Eat, Sleep, Console model of assessment for substance exposed infants, as well as opportunities for overcoming barriers to implementation.
- Outline the major principles pertaining to initiation of Medication for Opioid Use Disorder or Medication Assisted Therapies (MOUD/MAT) for people with OUD, and identify appropriate resources for referral as needed for medication management as well as for community based behavioral health services.
- Identify barriers to the distribution of Naloxone in your clinical setting, and identify opportunities to overcome these.
- Describe components of a Family Care Plan for people with SUD and those who offer Recovery and Behavioral Health services for people with SUD.
- Evaluate resources for offering and sustaining education for providers and nursing staff regarding SUD, respectful and equitable care, and the Eat, Sleep, Console model.
- Utilize multi-disciplinary teams to support recognizing and addressing stigma and bias in practice settings.

MEET OUR HUB TEAM

Kimberly Spence, MD

Neonatologist
Saint Louis University School of Medicine

Misty Allen

Children's Division
Department of Social Services

Katie Althoff-Moore, RN, MSN, NE-BC, RNC-MNN, C-ONQS

Regional Dir. of Women's Services/Family Birthplace
SSM Health St. Louis

Alan Barnette, MD

Neonatologist
Saint Francis Health System

Katie Hocker, MD

Pediatrician
Children's Mercy Kansas City

Melissa Odegard PhD, LPC, NCC, CCH

Licensed Professional Counselor
Southeast Missouri State University

Sarah "Sally" Kline, BSN, RN

EMBER Maternal SUD Program Manager
University Health

Traci Johnson, MD, FACOG

Maternal-Fetal Medicine Physician
University of Missouri - Kansas City
