PROGRAM NOTES

WAMC

Spring is nearly at our doorstep! As temperatures rise and the clocks move with the change of the season you can look forward to WAMC keeping up throughout it all. This month we have a few things to keep you to date with and informed as the days keep charging on.

First, WAMC Live in Concert aired its last show February 22nd and 25th. We are incredibly proud of the magnificent showcase of concert recordings that we've been able to present both as the current program and its predecessor, "Live at the Linda." Our efforts are now squarely focused on growing WAMC On The Road by getting out into our communities full-time, meeting listeners where they live, and engaging in first-hand conversations. We appreciate all the years of support and appreciate you.

WAMC Live in Concert will be succeeded by [Science Friday](#), airing on [Fridays at 8pm](#) and followed by wonderful hour of [Science Friday at 9pm](#). Each Friday, journalists Ira Flatow will be joined by listeners and studio guests to explore science-related topics.

[This American Life](#) will be airing on [Sundays at 8pm](#) and [Reveal at 9pm](#).

Right after, you'll hear a repeat of [The New Yorker Radio Hour at 9pm](#).

This month on [Earth Wise](#): The Trump administration formally rejected the scientific finding that greenhouse gases threaten human life and wellbeing, weakening federal authority to regulate climate pollution. In response, many states are moving ahead with their own efforts to cut emissions. States like Colorado, Virginia, and California are advancing electric vehicle incentives, expanding solar power, and pursuing ambitious climate goals. Meanwhile, outside the policy arena, the climate itself continues to change. Warmer oceans are intensifying the strongest tropical cyclones. Expanding hot spots in the North Atlantic and western Pacific are fueling storms so powerful that some researchers say a new Category 6 designation may be needed for systems exceeding today's Category 5 scale.
