

A world of me

by Aden Li

Do you need help creating a new world? Well, you found the right person! Here is how I would create a new world.

To start, I would create a new world by letting everyone eat noodles, mac-n-cheese, spaghetti, rice, and soup dumplings everyday without getting sick or getting a hurt belly! For example, my food factories would put a liquid made of vegetables and protein into the food that will make the food very, really, and super duper healthy.

Another thing I would put in my world is that you can drink apple juice, lemonade, and soda everyday without getting sick or getting a hurt

belly. My drink factories would put a crumb that removes sugar but keeps the taste in the drink.

The next things I would put in my world if I made one is a kind of bed where you get 24 times the amount of energy you get in a bed you sleep in than the bed you sleep in now. Go sleep for 24 seconds. If you sleep in these beds, you get the same amount of energy, just in 1 second.

After that I would make sure all the houses are made out of slides, obstacles, and ziplines that are soft. The houses are also shaped like animals. If it was a cat, a slide could be tail! The slides would be tunnels, and cylinders that spin! The obstacles would be islands, spikes, and wonky tunnels!

Most importantly, if I created a new world, a thing that would be in it is that a bus would be a

long roller coaster and a car would be a bumper car!!!

(I think you know me now! I like to eat and drink
yummy things, do not like to sleep, and I like to play!
But I do know that I should eat and drink healthy,
sleep enough, and do meaningful things.)
