

The Great Computer Challenge, 2025

Graphic Design, Level 2

Background

Deep in hidden corners of enchanted worlds, magical creatures roam—mysterious dragons, clever griffins, mischievous fairies, and gentle giants. These creatures need more than just a cave or a treehouse—they need a home designed just for them!

Each creature has a unique personality, special talents, and specific needs. Some fly, some swim, some breathe fire (oops!), and some just want a quiet place to read. As an official *Magical Architect*, your mission is to imagine and design the perfect home for one of these magical creatures. Think carefully about their daily routines, their hobbies, their environment, and how your design can make their life easier—and way more fun!

Guidelines & Requirements

- Your drawing must be your own work.
- You may use 1 or 2 digital objects (like clipart, stamps, or shapes) if they help make your picture better.
- Add **labels** or short **notes** to explain cool parts of your design.
- Show **details** inside or outside the magical home—or both!
- If you finish early, go back and add more fun details. Maybe even include the creature in your drawing!

Challenge 1: Magical Home

Create a detailed drawing of a magical creature's dream home using your imagination, creativity, and design thinking skills.

As you plan your design, consider these questions:

- What kind of magical creature will live in your home? (Give them a name and personality if you'd like!)
- Where is the home located? (Underwater, floating in the sky, hidden in a volcano, deep in a forest?)
- What does the creature *need* to live comfortably? (A fireproof kitchen? A pond inside the house? Extra-tall ceilings for wings?)
- What fun or relaxing spaces might your creature enjoy? (Art room, flying practice area, enchanted garden?)
- What kind of materials or magic powers could help you build it?

Judging Criteria

- Creativity and originality of the design
- Attention to detail and thoughtful planning
- Use of color, space, and artistic techniques
- How well the design fits the creature's needs and personality

***Have fun and thank you for participating in the
Great Computer Challenge, 2025!***
