But Why: A Podcast for Curious Kids

Hopes And Dreams For 2021 From Kids Around The World

January 1, 2021

[Jane] This is But Why: A Podcast for Curious Kids from Vermont Public Radio. I’m Jane Lindholm.

On this podcast, you send questions and we find answers. Well, that’s usually how it works anyway. This week, we asked the question and you are doing the answering! We asked you what your hopes and dreams are for 2021. And what you’d like to accomplish in the New Year. These are sometimes called New Year’s Resolutions.

And oh my goodness, we’ve gotten more than 100 responses to that question! So get ready: in this episode we’re going to hear all of them! I know it’s a lot, but Melody and I have found it really interesting and inspiring to hear so many of you talk about what you want the world to work toward in 2021, and I think you will too.

So Melody Bodette is actually joining us today. Melody, normally you’d be in the studio with me, but we haven’t seen each other since March, just like a lot of our friends who are listening may not have seen their friends or family members. So I'M in the studio, but where are you?!

[Jane] In your closet?!

[Melody] It’s a trick that radio people use when they can’t be in a studio, because all the soft clothes in your closet help absorb the sound so my voice doesn’t bounce around and echo like it would in a big room!

As Jane said, we were thrilled to hear from so many of you, and we’re determined to get all of you in this episode.

[Maya] Hi. My name is Maya. I'm from Toronto Ontario. My environmental wish for 2021 is that we can stop so much pollution. My personal wish is to learn Urdu and to convince my brother to get a cat or dog!

[Sonia] Hi. My name is Sonia. I'm seven years old. I live in Chicago, Il. My New Year’s resolution is to do a one-handed cartwheel or a handstand!
[Martin] Hello. My name is Martin. I'm six years old. I live in Wye England. My new year’s resolution is to have a happy new year. Thank you!

[Jane] Wow, those are cool goals, Martin, Sonia and Maya! But Melody, before we get too deep into all of our dreams for 2021, let’s tackle a couple of questions that seem relevant:

[Camille] Hi. My name is Camille. I'm nine years old. I'm from Chicago, IL. My question is why does the New Year always start on January first?

[Jane] Melody, you did some research on this. What did you find?

[Melody] Well, the New Year starts on January 1, because a long time ago someone decided it started on January 1st!

For most of human history, different groups of people and religions and cultures used different calendars. Some cultures used calendars that followed the moon and stars. Other cultures started the New Year when winter ended and spring began. But in ancient Rome, the year stared on January 1st. January was named for the Roman god Janus. Janus is the god of doors and gateways, and the god of transitions—beginnings and endings. Janus is often pictured with two faces.

Back in 1582 the calendar we use now, called the Gregorian calendar, was created by an astronomer for the Roman Catholic church, and the first of the year was officially set at January 1st.

Most of the world now follows this same calendar, for a couple of reasons. One has to do with colonialism, and the power of the Catholic Church in history to force other people and cultures to adapt to its rules.

But the other reason is that these days it’s a lot easier if we all use the same calendar and dates. Some places use multiple calendars. There are also religions that use different calendars. And many cultures celebrate New Year’s holidays that are based on other calendars. But most people and places use the Gregorian calendar for official business.

[Tejas] Hello. My name is Tejas. I’m from Canberra, Australia. I’m ten years old. Who invented New Year’s Celebrations and why did they do it?

[Jane] For as long as there have been calendars, people have celebrated the first day of the New Year! It’s human nature to mark the passage of time. And to want to celebrate making it through another year! It gives us a chance to reflect on what the past year has been like, and to look ahead to the New Year. It’s similar to why we celebrate birthdays.

But how we celebrate the New Year depends on what our culture and family traditions are, and where we live! There are a lot of different kinds of celebrations. But it’s a
common tradition in many places to set a New Year’s Resolution: something you want to achieve or have happen in the coming year.

[Melody] Speaking of which, let’s get back to what you have been telling us about what YOU want to see this year! It probably won’t surprise anyone to hear that a lot of you just want one thing above all else:

[Nick] Hi My name Nick. I live in Litchfield, CT. My hope is that COVID 19 is cured and everyone gets better.

[Wren] Hello. My name is Wren. I'm from Colorado. I'm seven years old. I hope next fall there's no coronavirus!

[Alexis] I'm Alexis. My hope for 2021 is that people will not go so sick and that coronavirus will end.

[Gwen] I'm Gwen. I'm five years old...six years old. I live in Santa Cruz. I want coronavirus to stop!

[Melody] And we also heard from Ella who's almost 12 and lives in Colorado, she wants the world’s problems to be solved, including COVID-19!

[Jane] With so many of you concerned about the coronavirus pandemic, we wanted to get a little advice from someone who could give us a sense of when we might be able to expect life to get back to normal.

[Jennifer] My name is Jennifer Nuzzo. I’m an associate professor at Johns Hopkins School of public health.

[Jane] Jennifer studies pandemics and she’s been talking to lots of adults, on TV and in meetings with government officials, and here’s what she told us.

[Jennifer] The good thing is that it will end, but I don’t think it will be as soon as any of us would like! There are vaccines that are starting to be used, those are important tools to protect people. We don’t yet know whether those vaccines will stop people from transmitting them. If they do they will stop people from being sick, but in the immediate term, we think the number of people getting sick will drop as more and more vaccines are used.

[Jane] A lot of you sent us messages about the vaccine:

[Clementine] My name is Clementine. I'm seven years old. I live in Sydney, Australia. I hope that the COVID vaccination works!
[Max] My name is Max. I'm seven years old. I live in Boston, MA. My hope for the New Year is that there's a vaccine for the Coronavirus.

[Josiah] Hi. My name is Josiah. I'm nine years old. I'm from Australia. My hope for 2021 is that we find a vaccine for coronavirus.

[Agnes] My name is Agnes. I'm eight years old. I'm in third grade. I live in on Long Island, New York. My hope for 2021 is for the vaccine for coronavirus and so coronavirus ends and we don't have to wear masks and stay six feet apart anymore.

[Fisher] Hi. My name is Fisher. I'm four years old. I live in Toronto, Canada. I hope everyone gets the vaccine so I can see my grandparents!

[Sofia] Hello. My name is Sofia. I live in California. I'm six years old. My hopes for the next year are kinda weird. I hope that COVID is done and that the vaccines are here. I'm hoping for the cold weather and fires to stop. I hope that everything turns back to normal when the COVID is done.

[Zain] Hi. My name is Zain and I'm six and three quarters. My wish for 2021 is that the coronavirus will stop and the vaccine will come out and we can do things we haven't done this year and we can have our birthday together this year!

[Jane] It’s going to take a long time to make enough doses of the vaccines for everyone to be protected. In most countries, public health officials are trying to figure out a fair way to get people vaccinated. And that usually includes trying to protect people who are most at risk first. So you might see people who are very old, or who have health conditions get vaccinated in these early days. And also people who work to protect us—doctors and nurses and other first responders. And then people who do jobs that are necessary to keeping our society running, and who have to be in contact with a lot of people. So maybe people who work in grocery stores or who are teachers in a school or who drive a bus will get the vaccine before everyone else.

[Melody] As for kids, we need to do more research before we can give the vaccine to children. But remember, the COVID-19 virus tends not to affect young people as much as adults.

[Jennifer] The good news is that children are less affected by this virus. It’s the grownups that we’re worried about. That’s why the priority is to vaccinate grownups!

[Melody] Another thing a lot of you are hoping to be done with in 2021: wearing masks.

[Julius] Hi. My name is Julius I'm seven years old. I live in Ottawa Ontario Canada. My question is for 2021 when will we stop wearing our masks?
[Noah] I’m Noah. I’m five years old. I live in Massachusetts. My hope is that I can play dates with my friends without wearing masks.

[Hailey] My name is Hailey. I live in Charlotte, NC. I’m 9 years old. My new year’s resolution is for COVID-19 to be over so we can see friends and families without wearing masks or having to quarantine for two weeks!

[Teddy] Hi. My name is Teddy. I'm six and a half years old. I'm from Richmond, Virginia. My New Year’s wish is I want to stop wearing masks.

[Jane] Jennifer Nuzzo says you’re going to need to practice patience on that one.

[Jennifer] We’ll have to keep wearing masks and limiting our contact, so that might mean not being able to see our friends for a bit longer, which I know is disappointing. My personal belief is that we’re probably going to live like through until summer, perhaps through the summer. I hope I’m wrong about that. Some people think it could be earlier.

[Jane] Kids have been doing such a great job of wearing masks and keeping your distance. I know it’s hard, but I have total faith in you that you can keep it up for a few more months to make sure everyone gets protected! And I want you to keep in mind something else: kids have been inspiring adults all through this pandemic. You have adjusted to doing school differently, wearing masks, not having play dates, not seeing some of your friends and family members. A lot of us adults look at you and say, if you can do it, we can do it. So thank you for helping your adults get through this, too.

Jennifer Nuzzo says young people have really been helping her get through this, too.

[Jennifer] You know, the thing that makes me hopeful is kids. I have gotten so many emails from students who have come up with really great idea of how to reduce the number of people infected with COVID. High school students have sent me some really impressive ideas to reduce the number of people infected with COVID. That to me, just seeing how young people have stepped up and tried to do what they think they can do to help other people. That makes me really hopeful.

[Melody] Many of you are telling us that you’re missing school. Here’s Jeremiah’s wish for the New Year. He’s 4 and lives in Mississippi:

[Jeremiah] In 2021, I wish I wanted to go on a school bus to school.”

[Payton] I'm Payton. I'm ten years old. I'm from West Bloomfield, MI. My hope is that in 2021 coronavirus will get better and we can go back to school and get back to our regular lives!

[Jack] My name's Jack. I'm six years old. I live in Chicago. I want to go back to school!
[Amy] Hi My name is Amy. I'm six years old. I live in Oregon. My new Year's resolution is that I hope I can go back to school next year and that everyone is happy!

[Liam] Hi My name is Liam. I'm six years old. I live in Minnesota. My hopes and dreams are that I can go to school and not stay home because of Coronavirus.

[Melody] Jennifer Nuzzo says you may be in luck! If you’re not in school right now, you should be later in the year, probably by when the northern hemisphere starts the new school year in our autumn!

[Naomi] Happy 2021, or two thousand and twenty one. This is Naomi Shihab Nye speaking from Texas. I am a poet, I am a friend of poetry, a reader of poetry since I was six years old and very honored to be called by the Poetry Foundation in Chicago the Young Peoples’ Poet Laureate in the United States. I wish you all a very good year. Here are a couple of things I would hope for you: I hope you are kind to yourself as writers. I hope you believe that you could write words down every day and be lead places that are interesting. I hope you have great surprises. I hope you feel cozy when you’re writing. I doesn’t have to be perfect. It doesn’t have to be gorgeous, but let it be your friend. Write what you need to write at any given moment. When you go back and read it later you’ll feel that honesty in it. I hope you get to go back to playgrounds and parks and festivals and libraries and all the beautiful places where people gather in the coming year. I hope you read some really great poems and share them with your friends. And I hope you stay safe. Big hugs, virtual hugs, from me, Naomi, to all of you.

[Jane] I’m so thankful that all of you were willing to share your hopes and dreams with us, both through your written emails and your voice messages! Here’s another goal we liked!
