# U.S. Macro Economy

# The COVID-19 pandemic recession is unparalleled since the Great Depression.

# Although massively painful, economists predict this will be a short-lived recession.

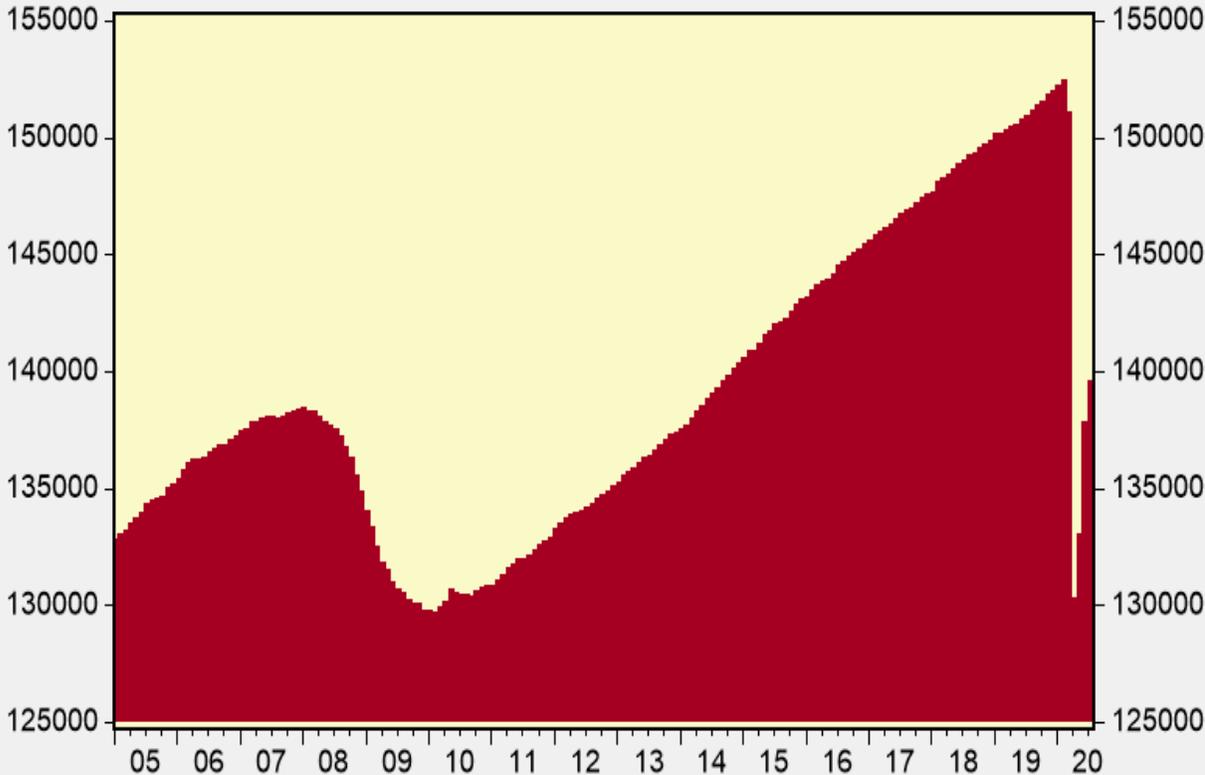

# Employment and Labor Markets

# The U.S. lost 22.2 million jobs between February and April 2020, and has since regained 9.3 million jobs through July.

# South Dakota labor sectors by share of total nonfarm employment.

# Labor sector mix – South Dakota metro and nonmetro areas.

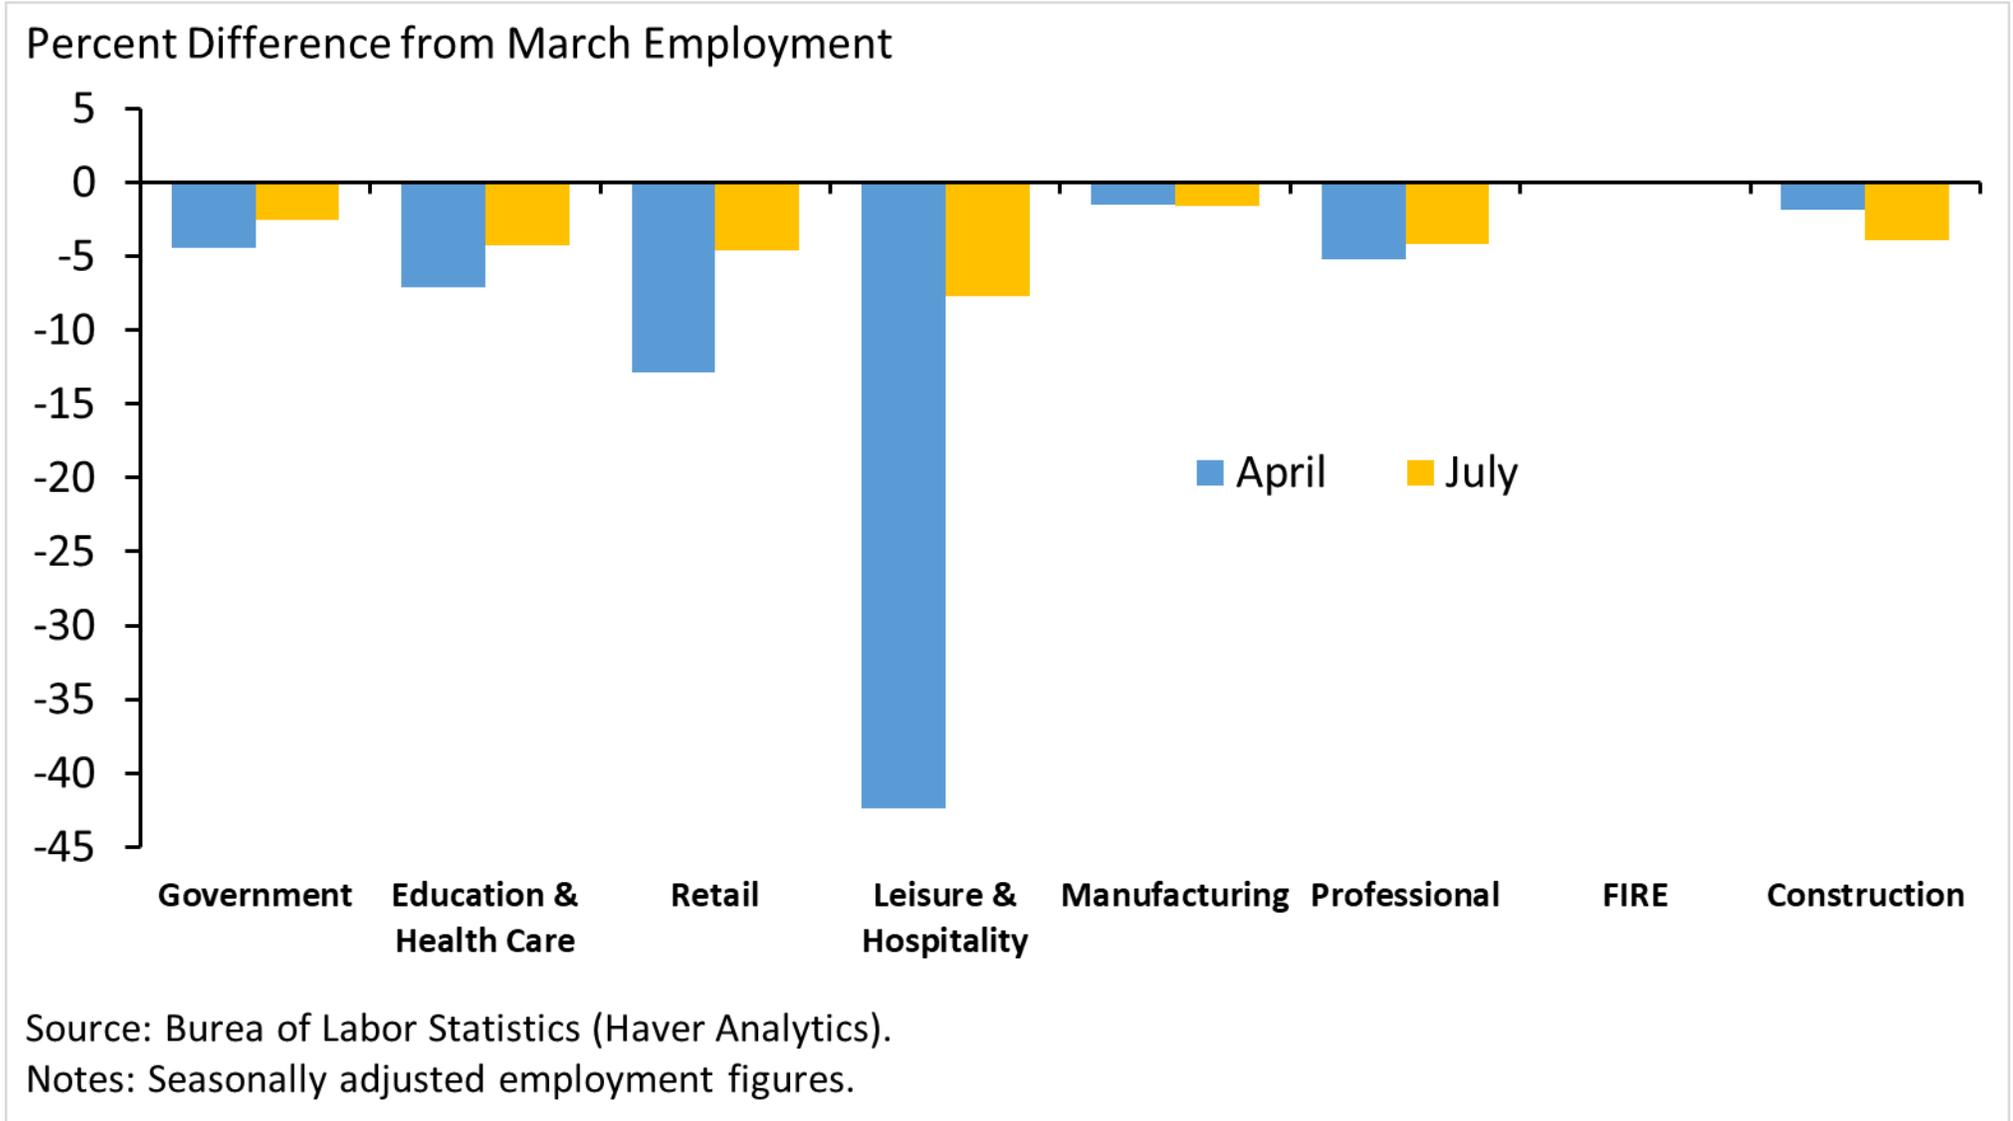

# The bulk of job losses in South Dakota have been concentrated in the leisure and hospitality sector.

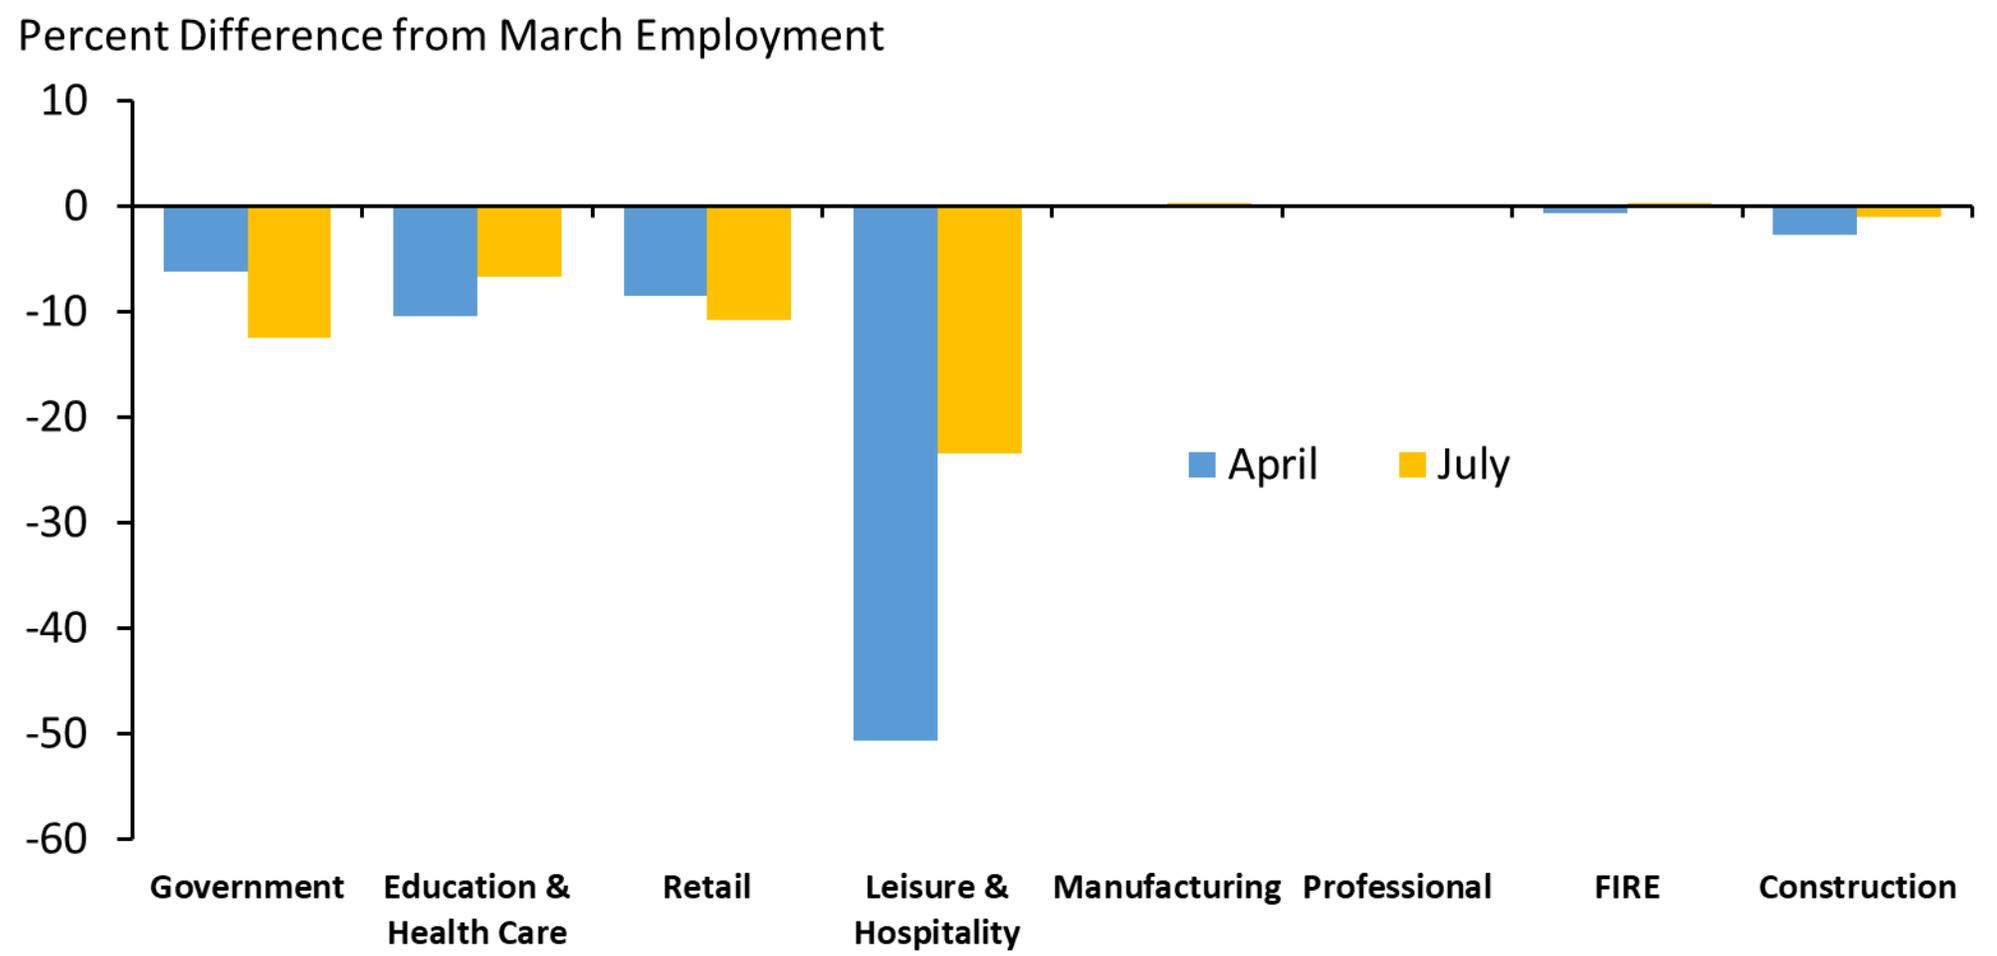

Source: Bureau of Labor Statistics (Haver Analytics).  
Notes: Seasonally adjusted employment figures.

# Sioux Falls job losses are concentrated in the retail and leisure and hospitality sectors.

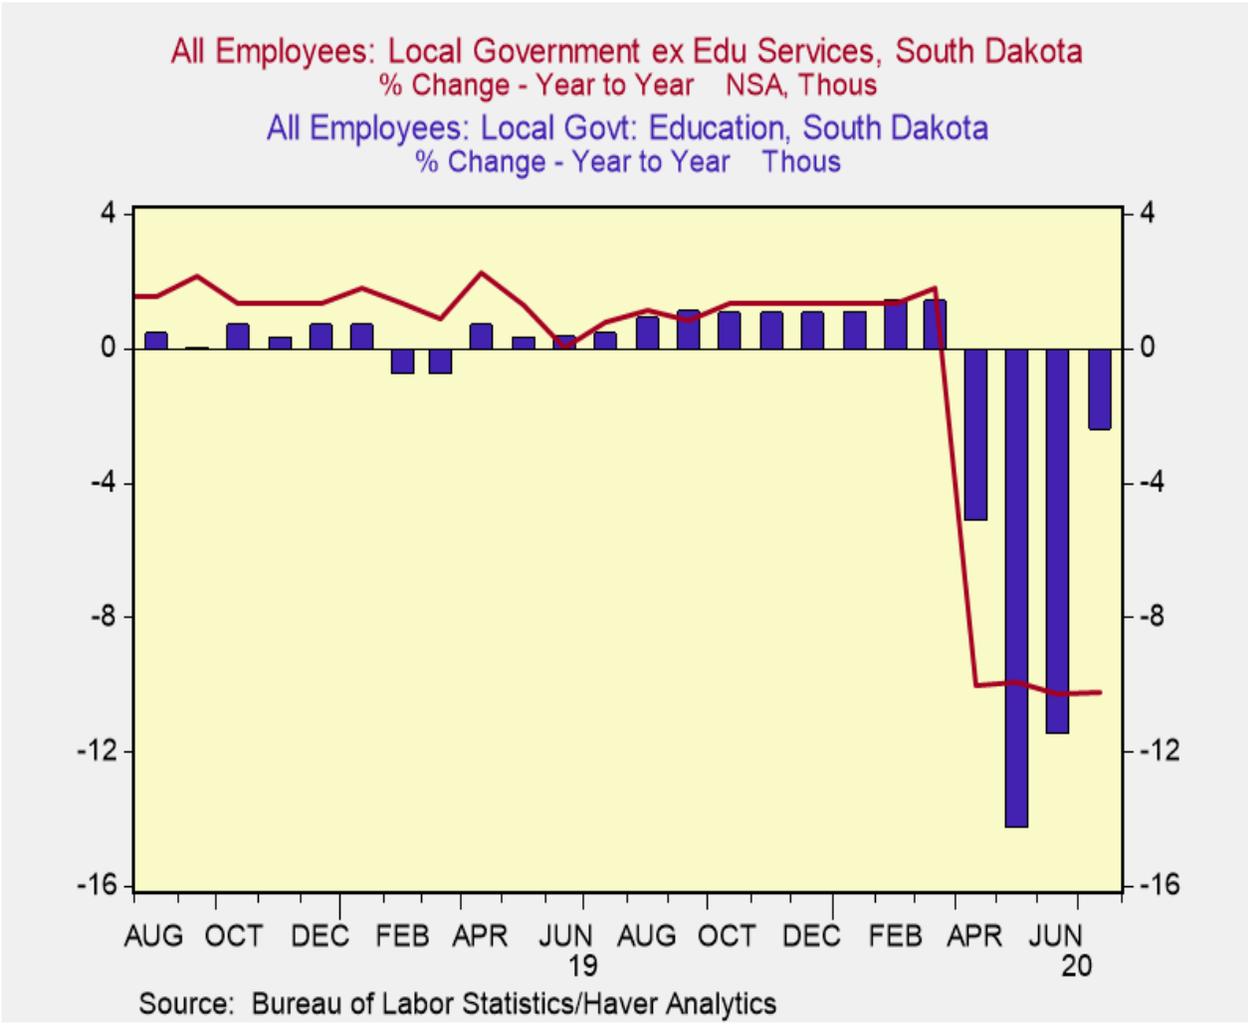

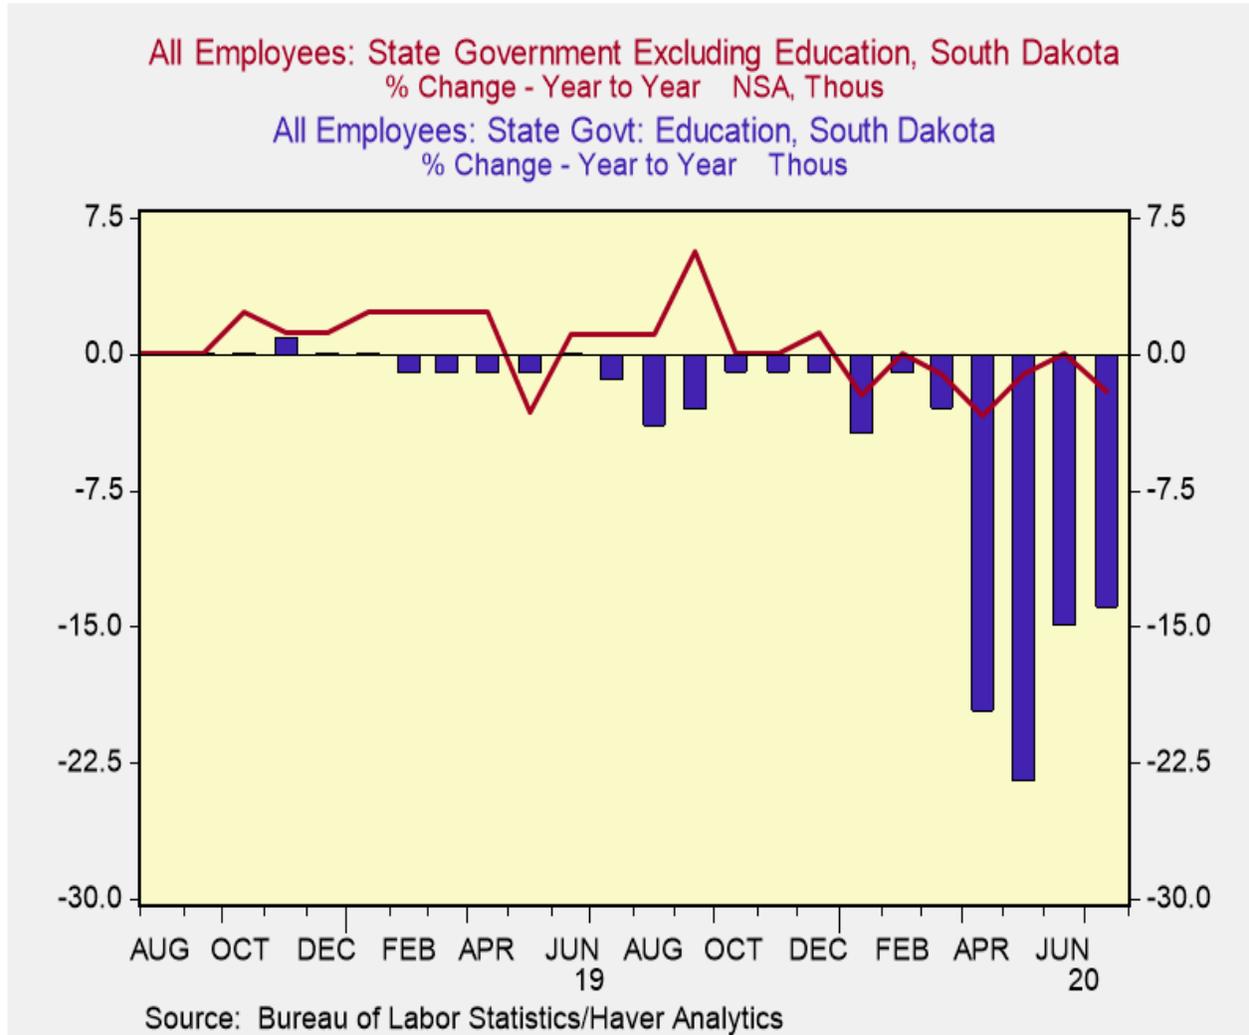

# Rapid City job losses are concentrated in the leisure and hospitality sector.

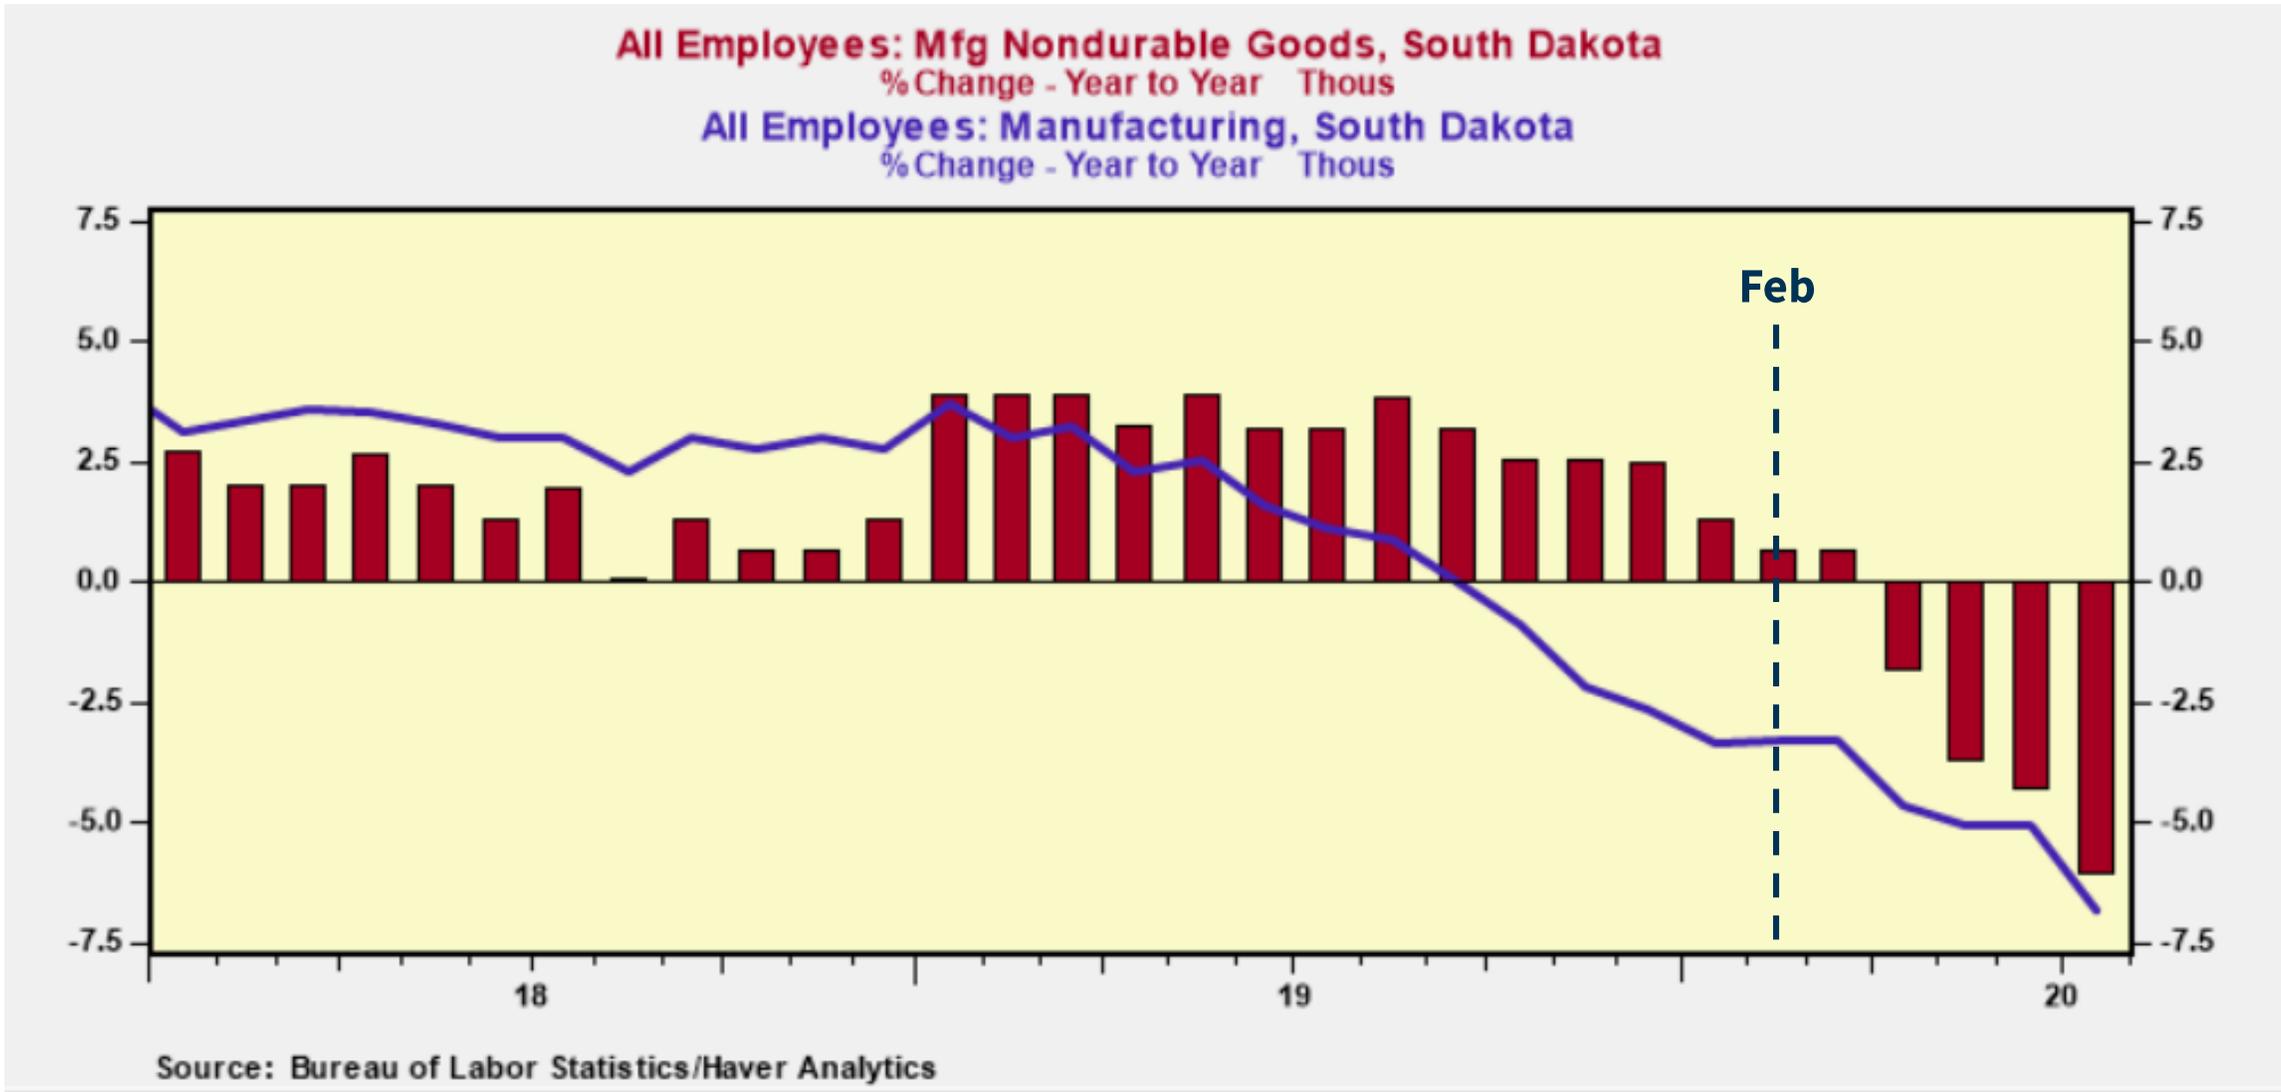

Source: Bureau of Labor Statistics (Haver Analytics).  
Notes: Seasonally adjusted employment figures.

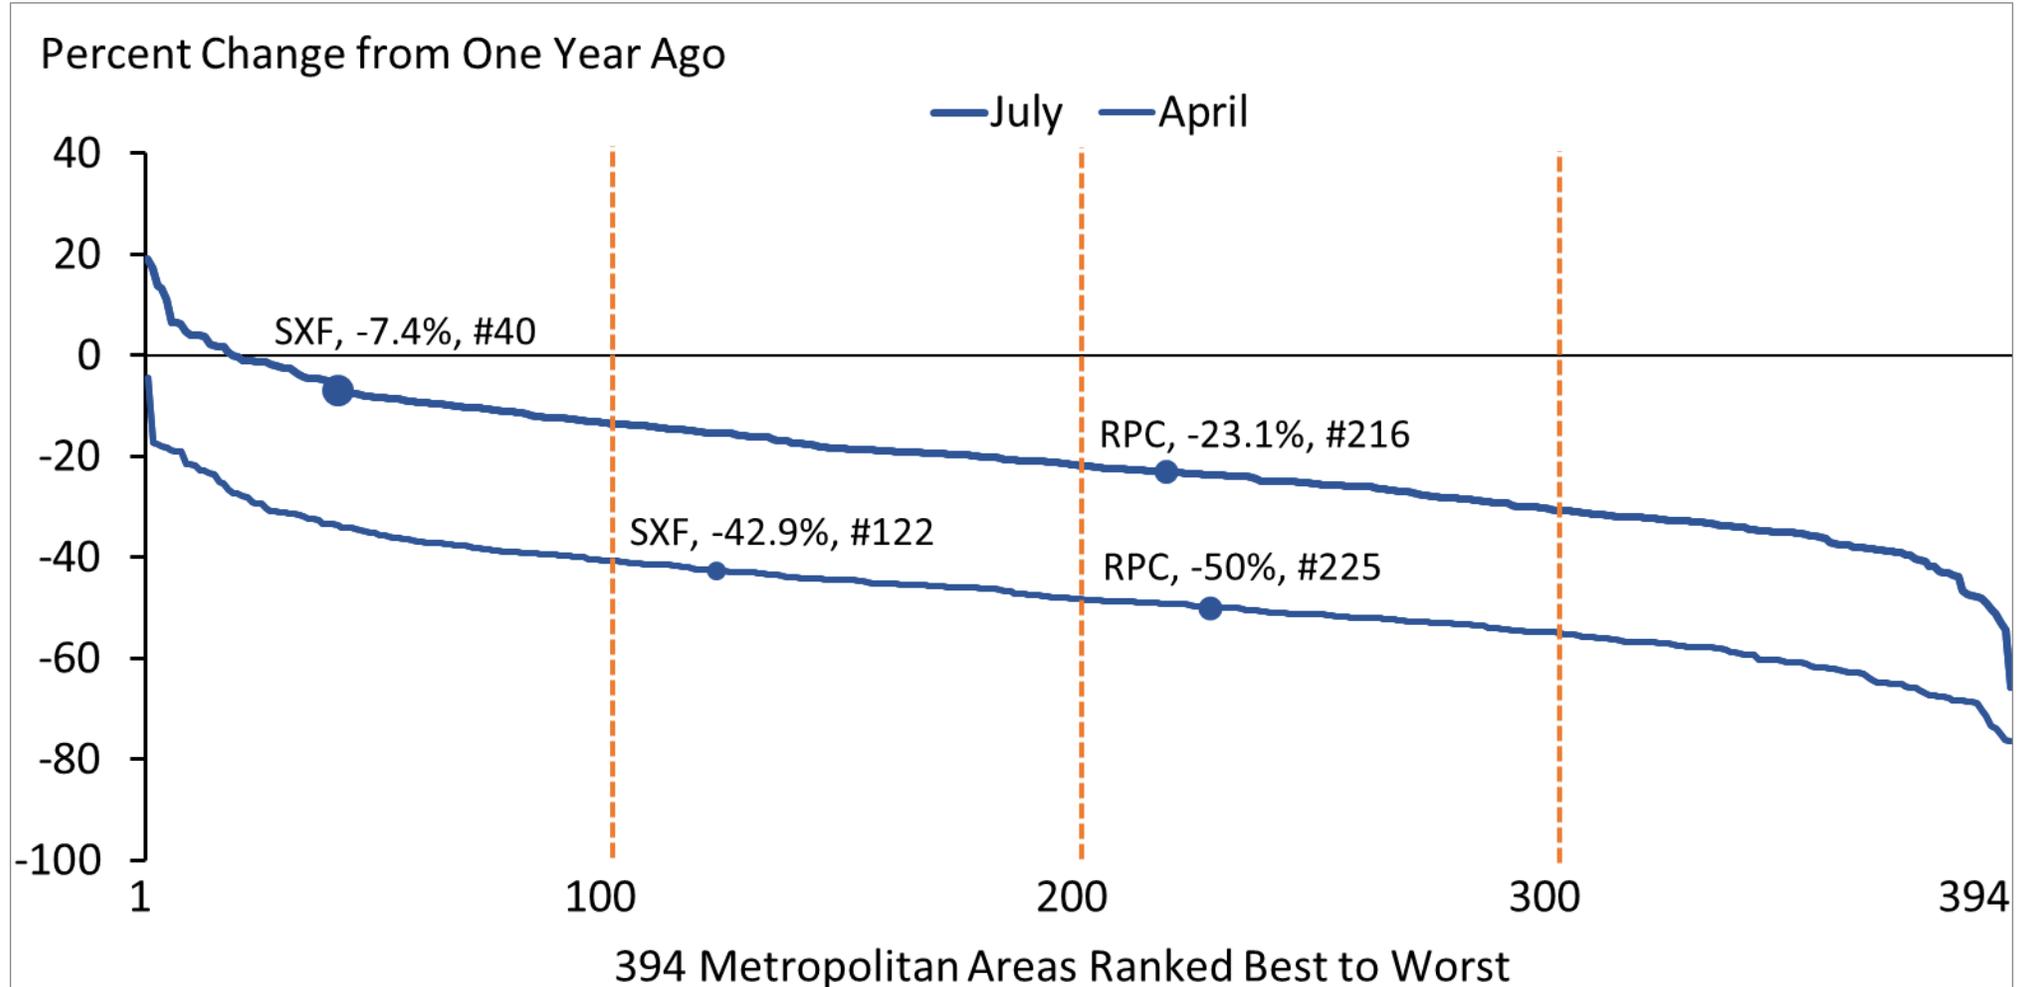

# State and local government have both shed jobs, but vary in degree and type.

# Manufacturing employment had been trending downward before the pandemic.

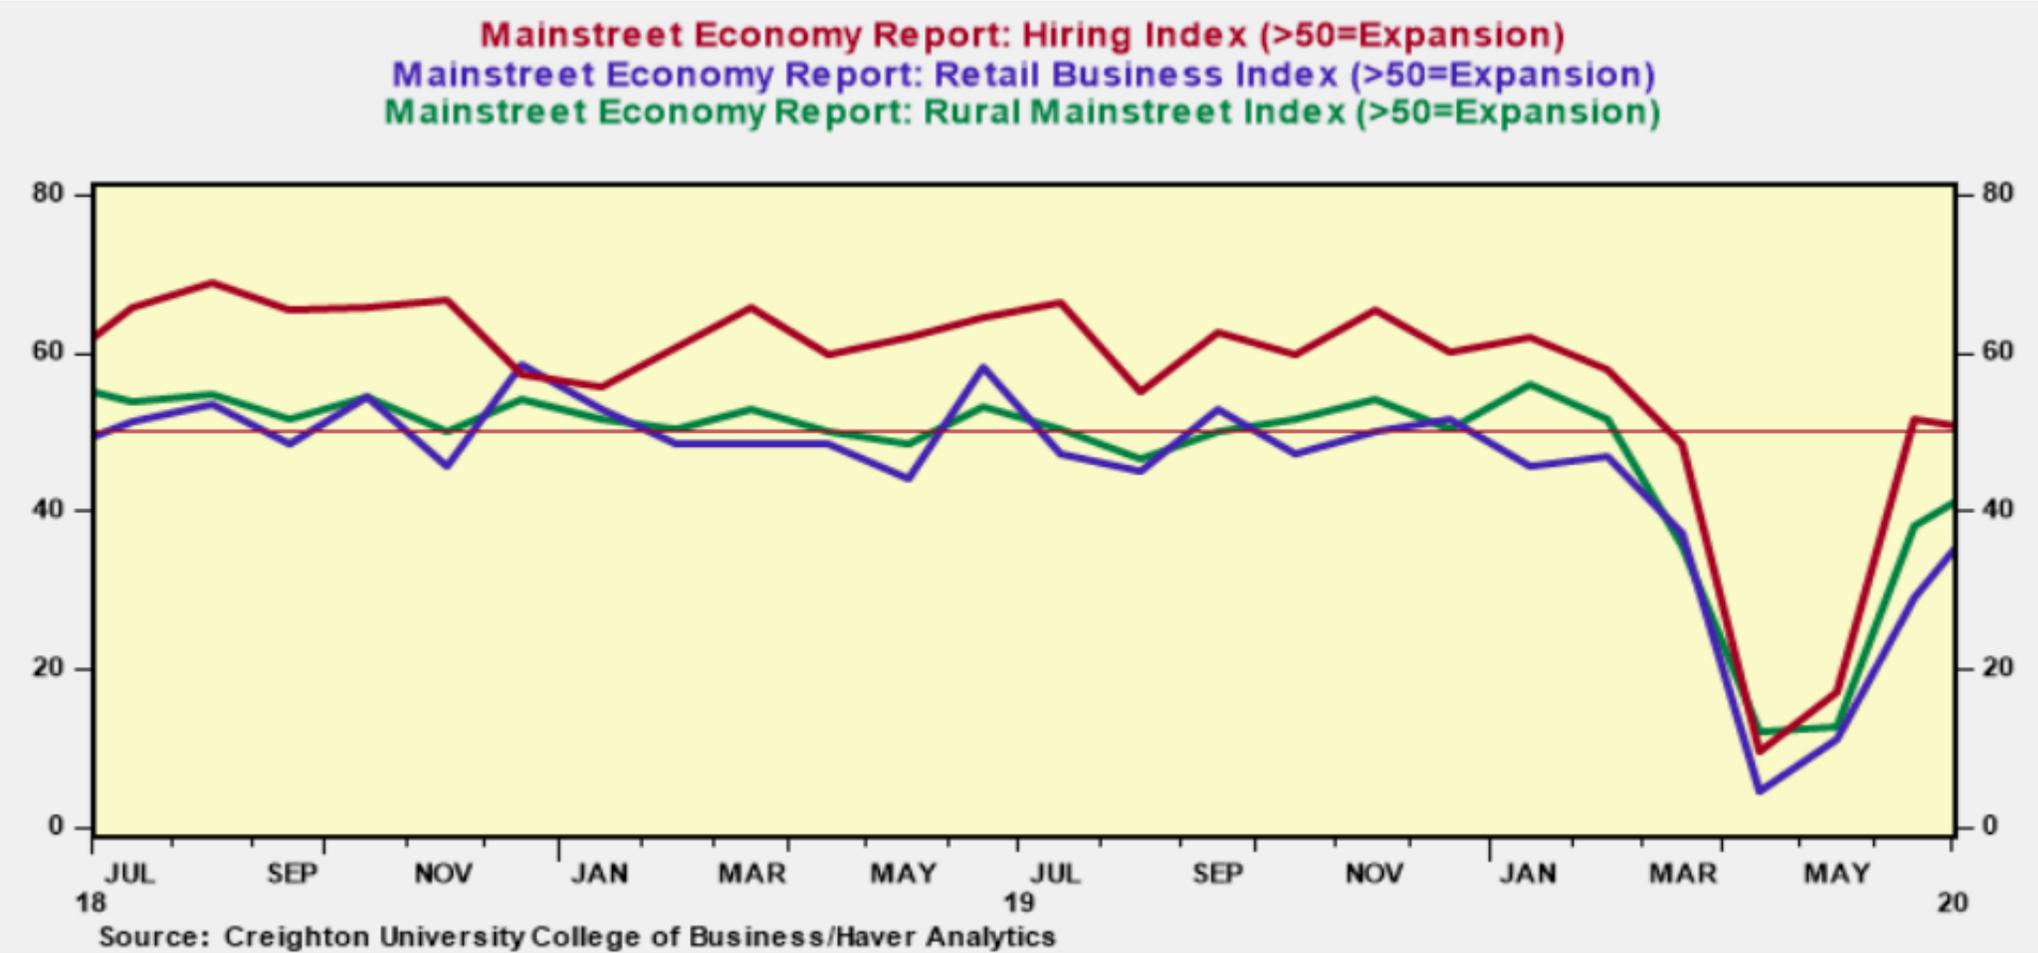

# Putting leisure and hospitality employment declines of Rapid City and Sioux Falls into a national perspective.

Source: Bureau of Labor Statistics (Haver Analytics).

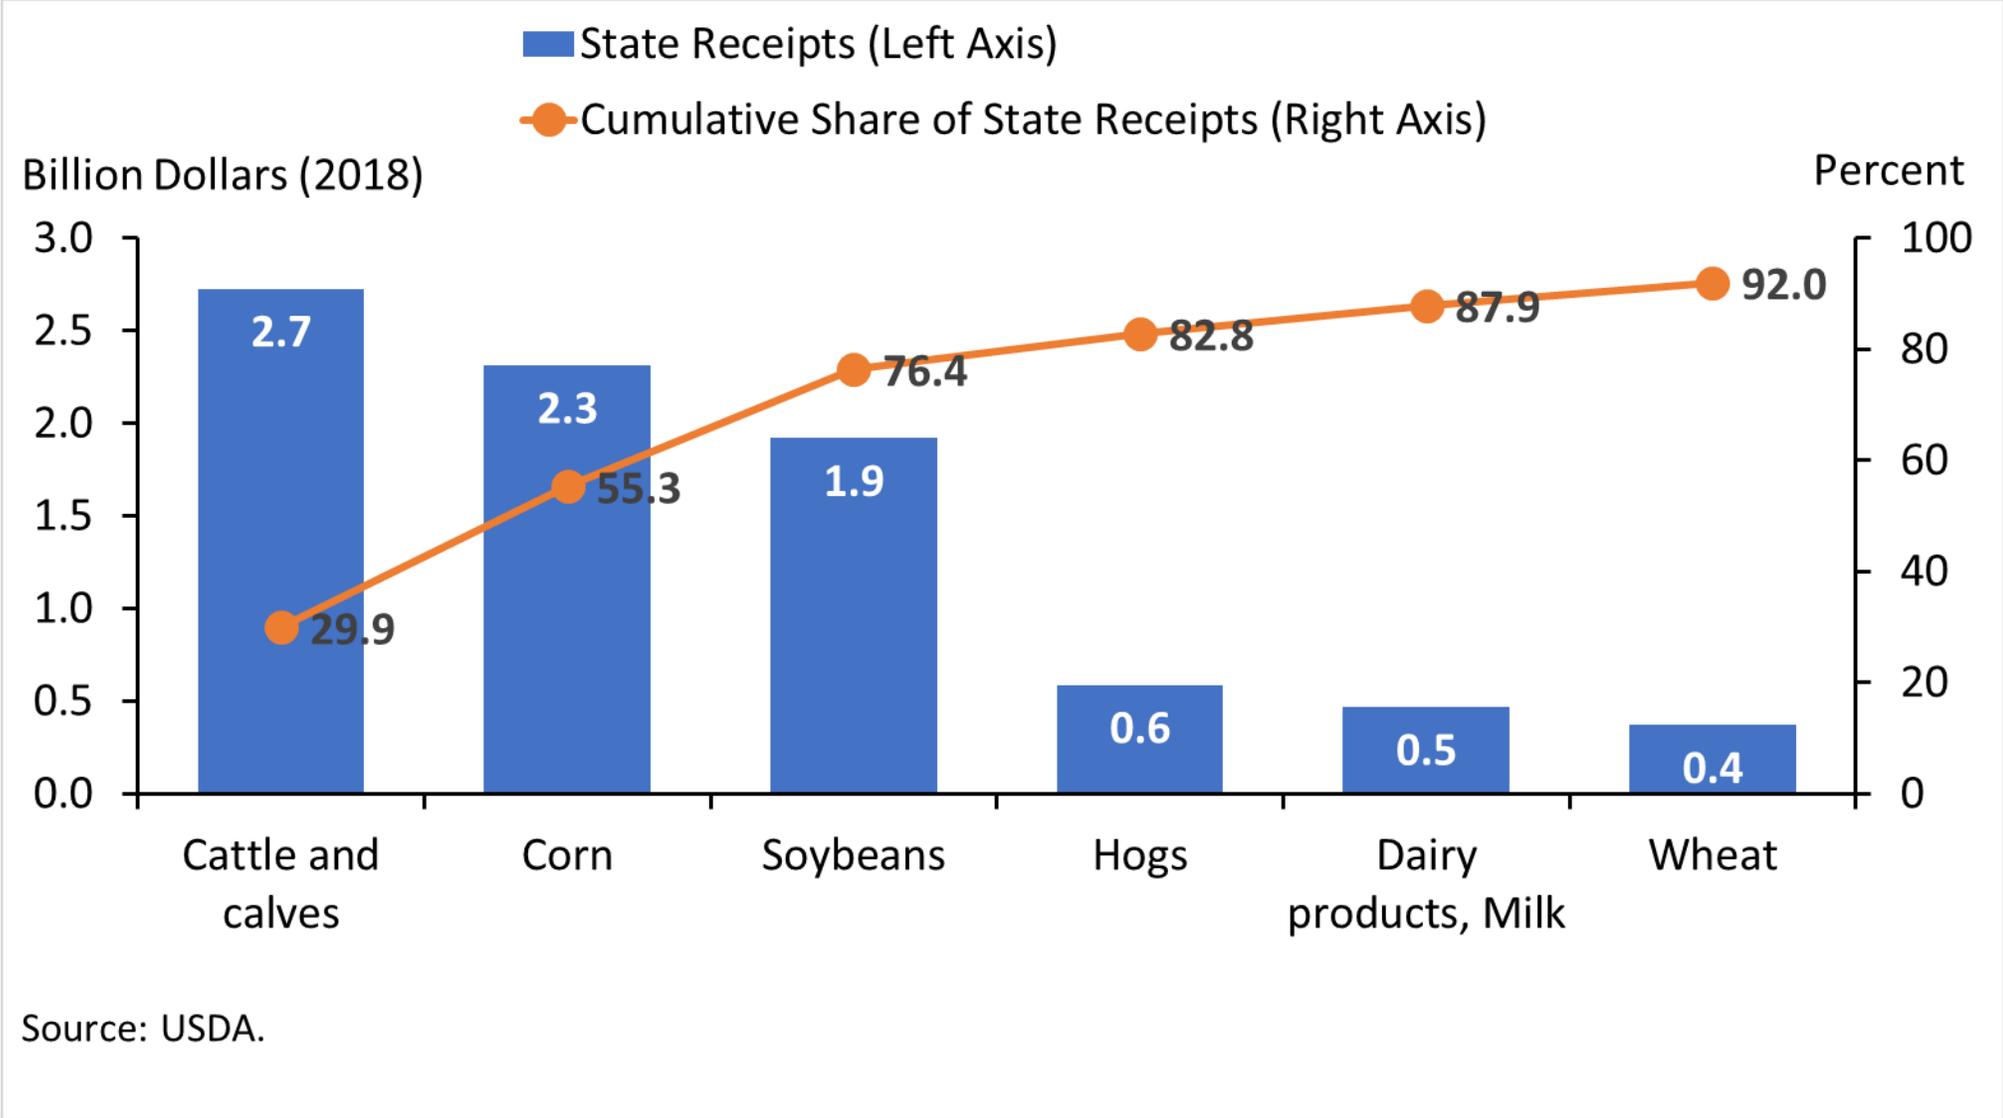

Note: Non-seasonally adjusted monthly employment figures.

# Small rural community bankers report that conditions on Main Street are depressed but improving.

# Agriculture

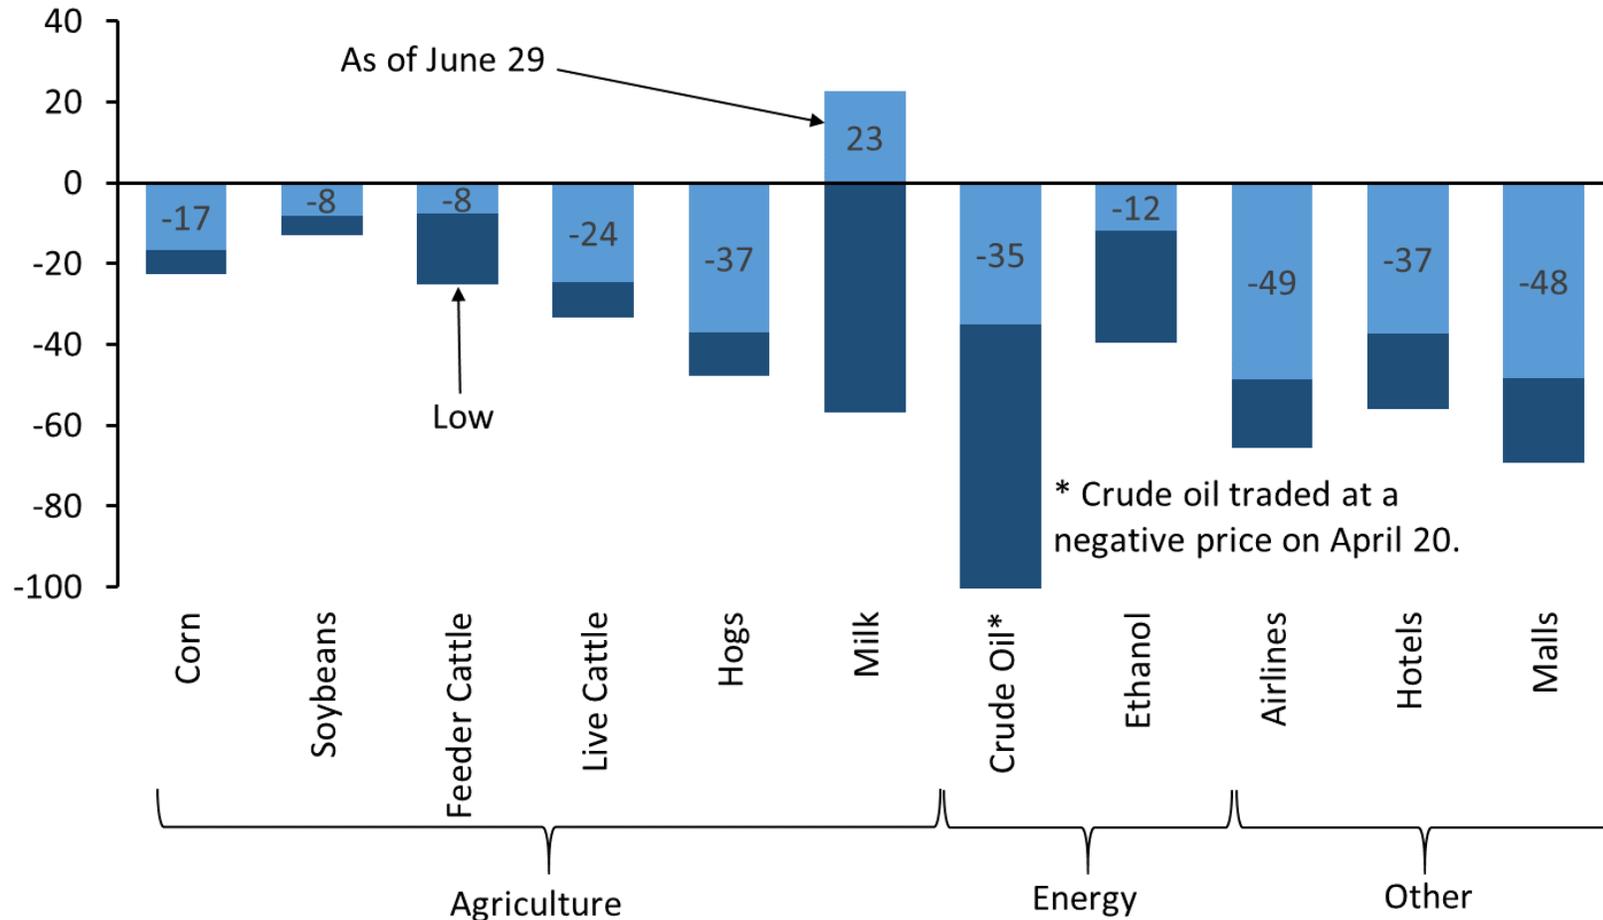

# South Dakota agriculture is dominated by cattle, corn, and soybeans.

# The human need for nourishment provides agriculture some natural downside protection.

Percentage Change in Price Since January 2.

Percent

Note: Agriculture and energy prices are based on front-month futures prices. Airline and hotel prices are based on Dow Jones stock indexes. Malls is based on average stock price of two major mall REITs.

## Two additional points to consider:

- The demand recovery for ag could be stronger and sooner than in other sectors.
- International trade offers ag an outlet that does not exist for all hard-hit sectors.

# **Hits to demand and mismatches and bottlenecks in the food delivery system caused ag commodity prices to decline.**

**School, restaurant, and other commercial food service closures reduced demand and created mismatches in the food delivery chain.**

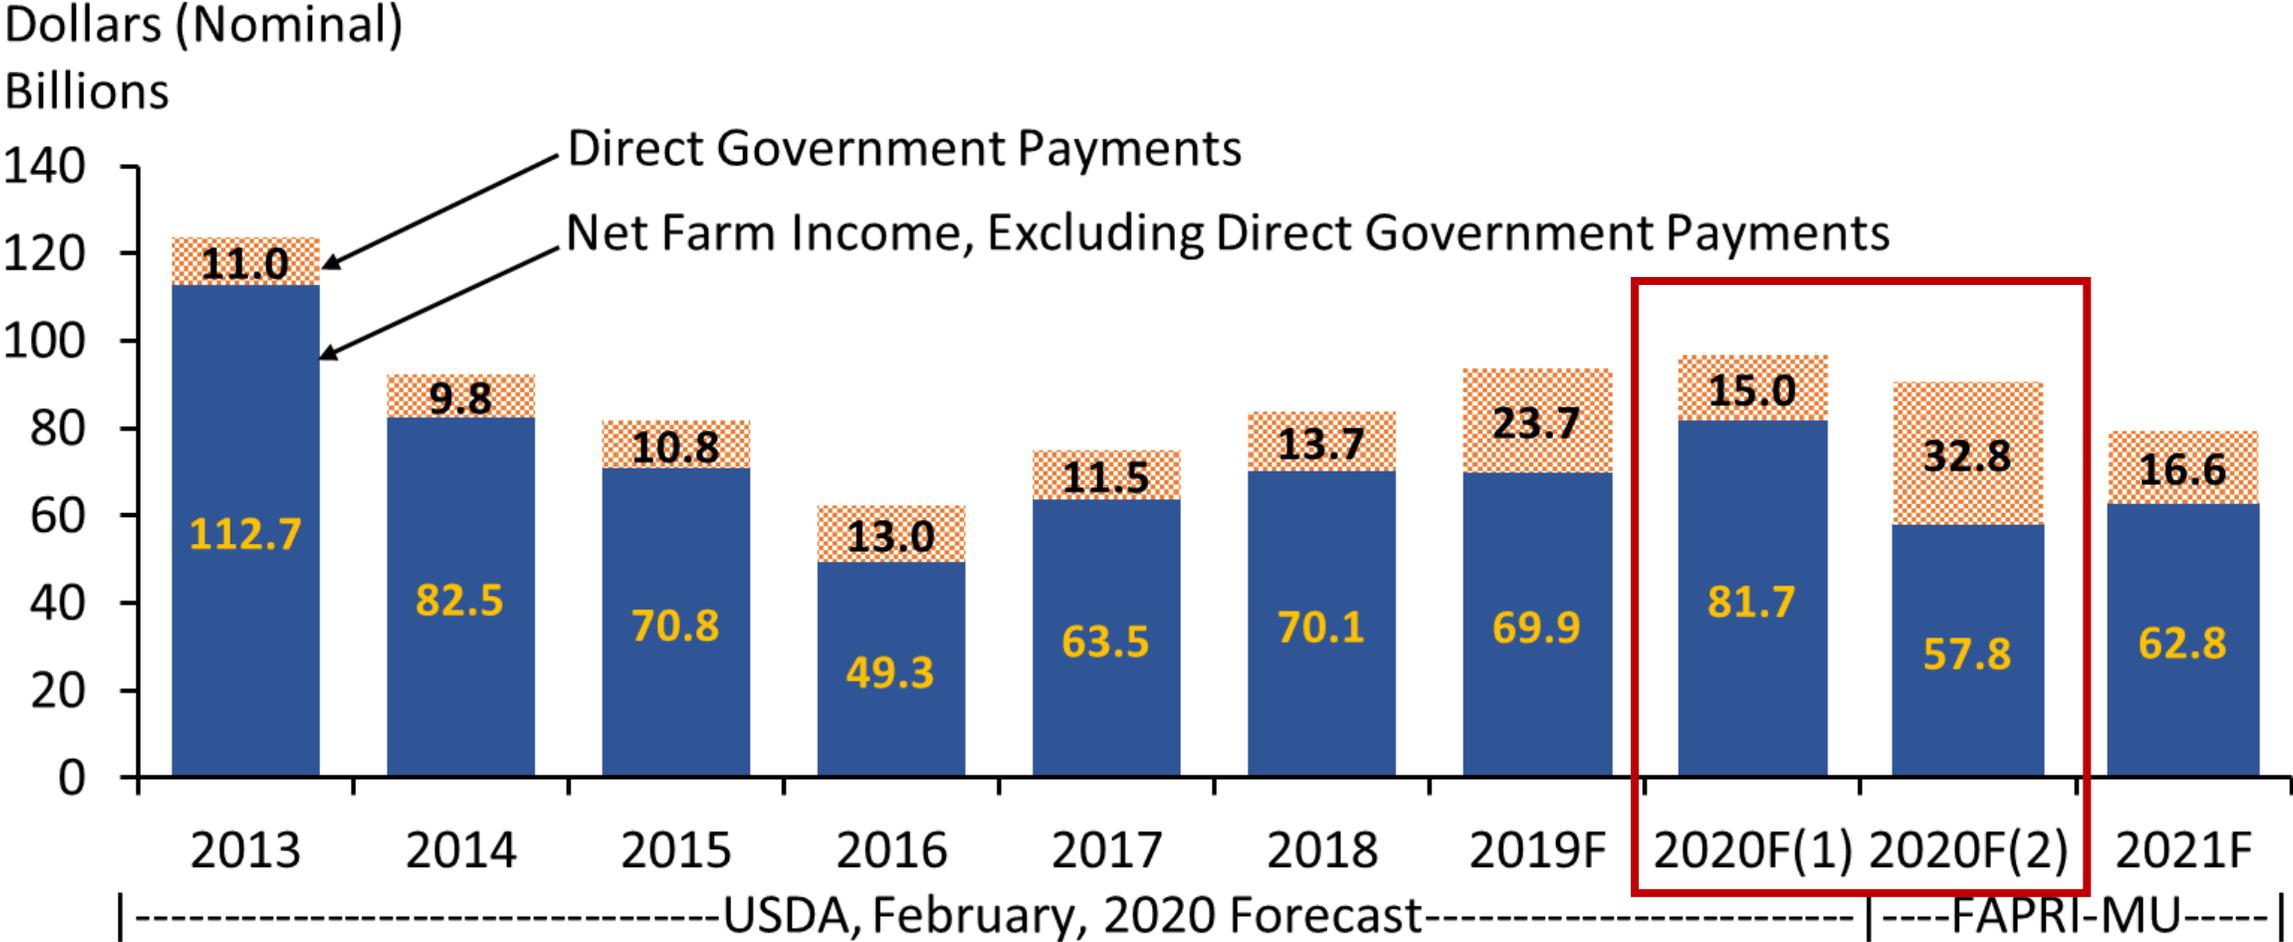

- Perishable milk and produce.
- Commercial packaging and labeling.

**Efforts to control COVID-19 infections among meat processing plant workers create processing bottlenecks.**

- At its worst period, beef and pork processing was down by more than 40 percent.
- April 28, 2020 Executive Order – processing has rebounded but is still below pre-pandemic levels and does not address the back-log that was created.
- Euthanizing animals has been minimal so far, but that could change.

# The pandemic's damage to farm revenues is expected to be large, but federal support will provide substantial relief.

## Net Farm Income

Sources: USDA, Food and Agricultural Policy Research Institute, University of Missouri (FAPRI-MU).

Notes: F indicates forecast. USDA's 2020 forecast (1) is as of February, 2020; FAPRI-MU's 2020 forecast (2) is as of June, 2020.

# South Dakota farmers have received nearly half a billion dollars in direct payments under the USDA CFAP.

## USDA Coronavirus Food Assistance Program

### Direct Payments Approved

\*Missouri's payment total does not match the sum of the four major commodity sectors as some aquanursery producers have received aid from the expanded CFAP program.

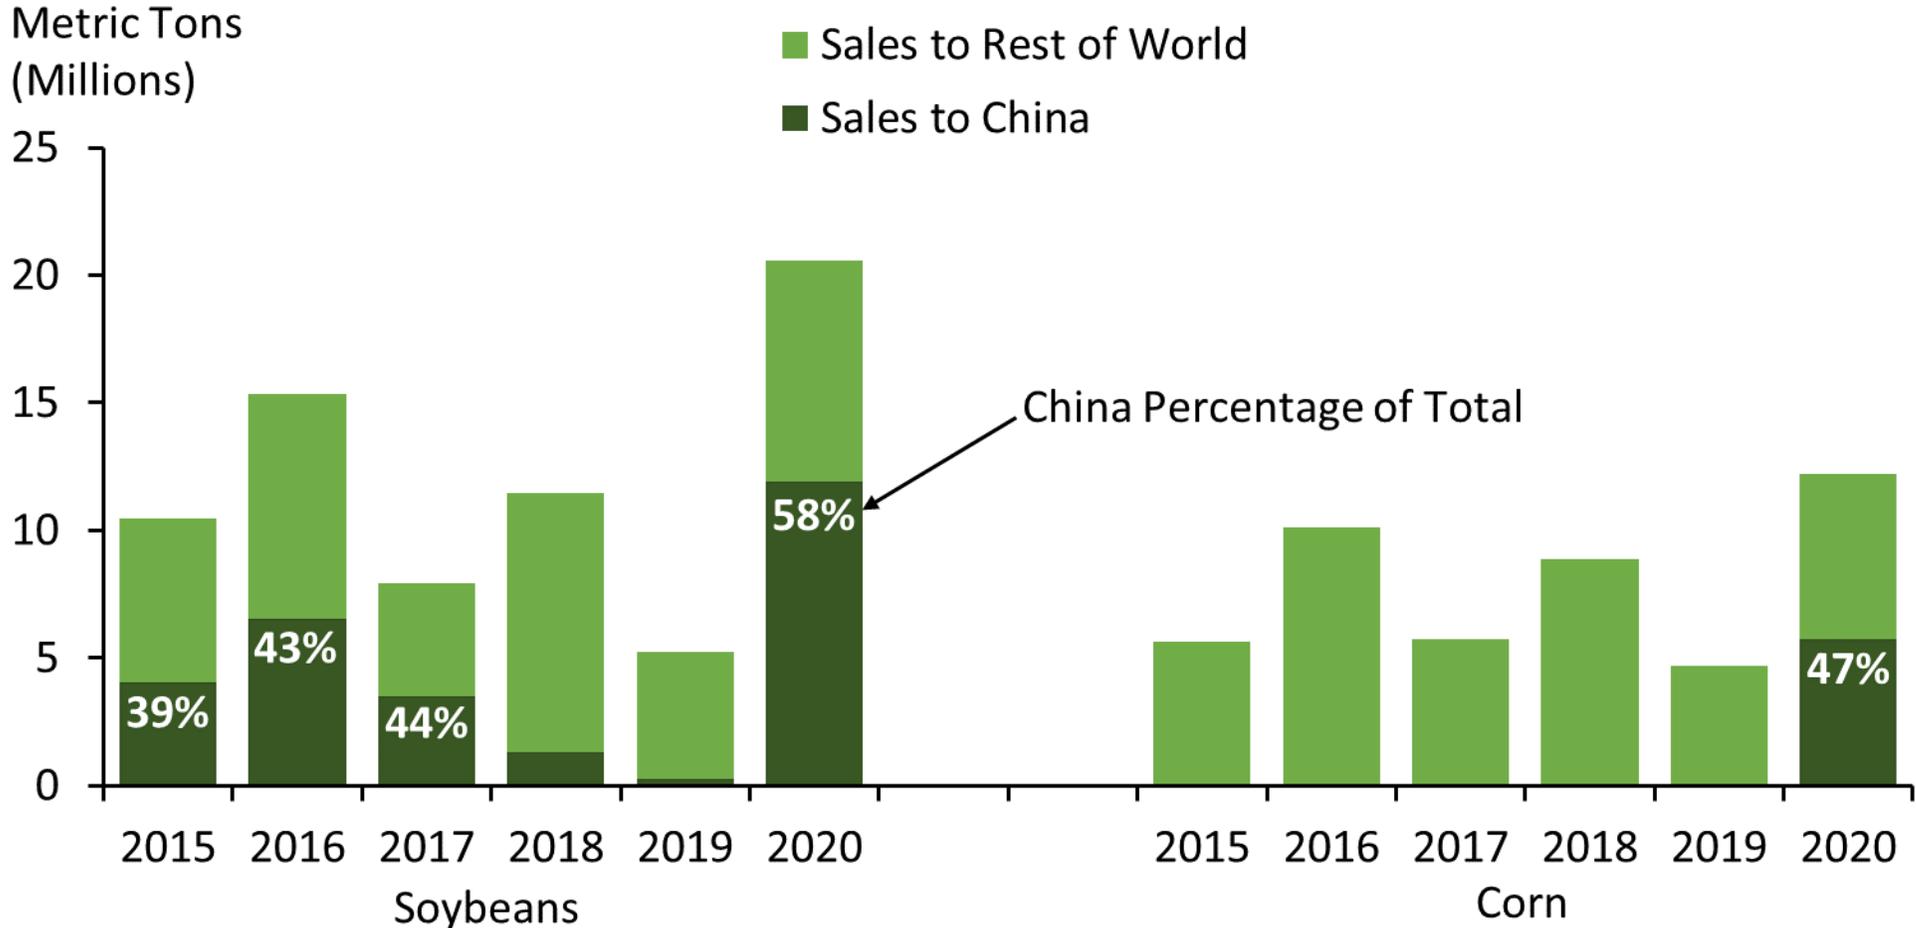

# Uncertainty surrounding China meeting their trade commitments is rising but there is still some optimism.

Source: USDA Foreign Agricultural Service.  
Note: Dollar figures are nominal dollars.

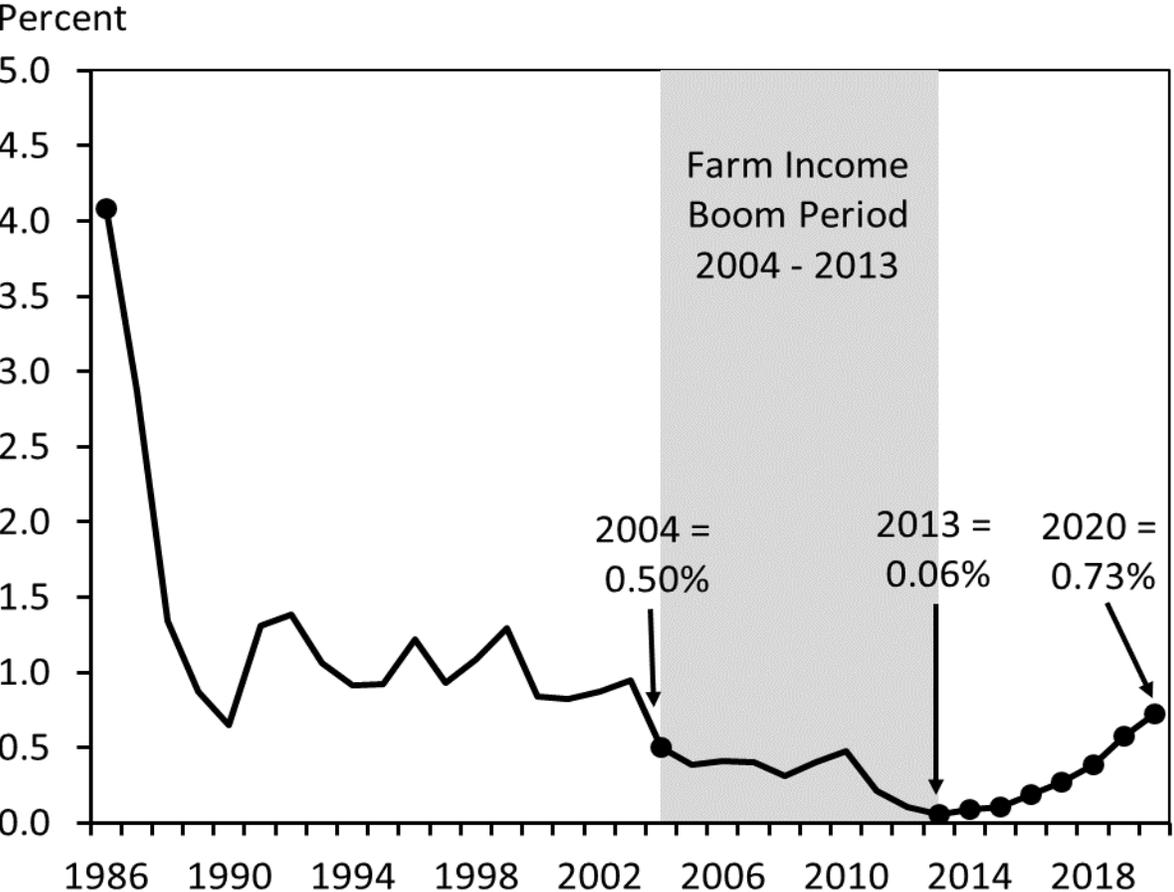

# Sales of new crop corn and soybeans have significantly outpaced levels experienced during the prior 5 years.

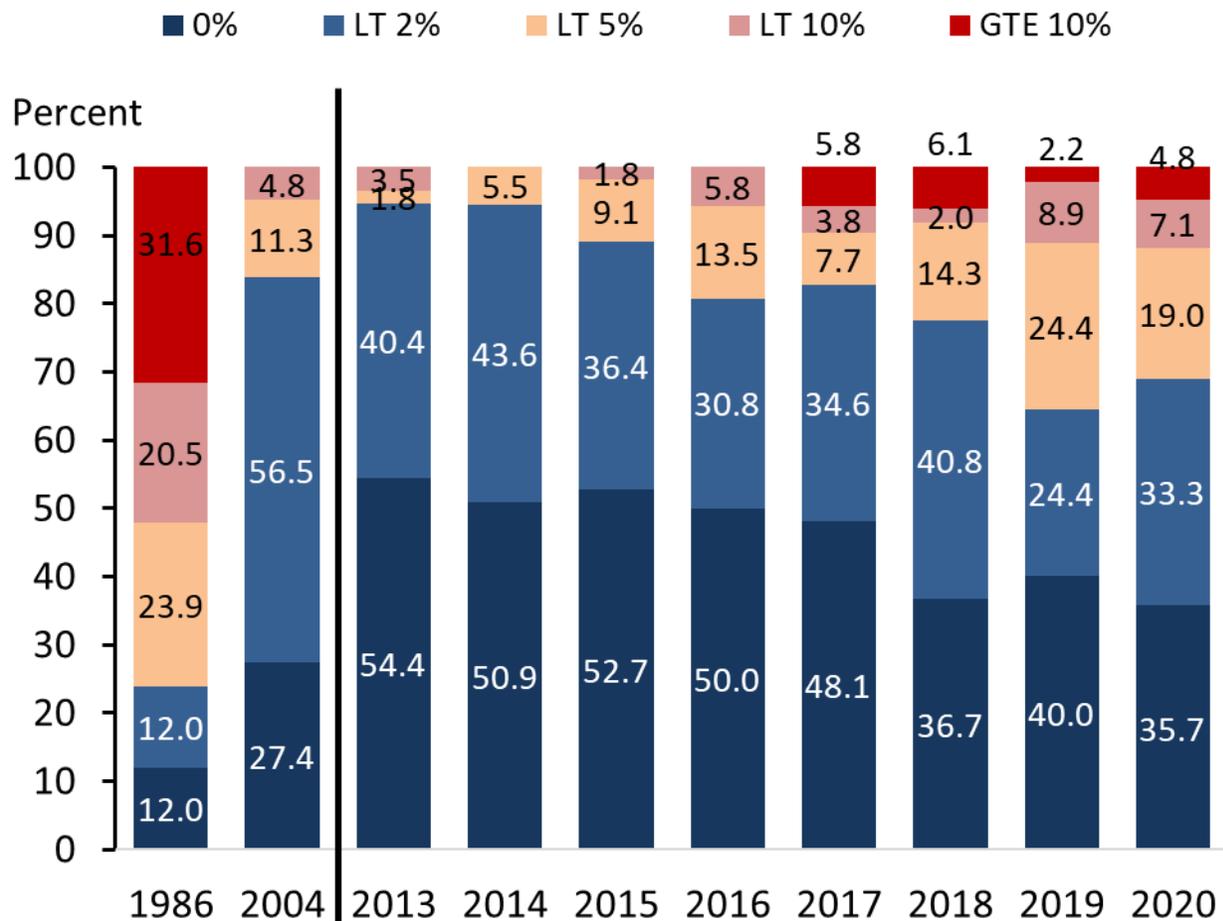

Source: USDA (Haver Analytics).  
 Note: Next marketing year sales as of week 49 for each year.

# Reported agricultural loan delinquency ratios continue to rise, but remain on the low-side by historical comparison.

**Median Agricultural Loan Delinquency Among Farm Banks**

**Shares of Farm Banks by Ag Loan Delinquency Buckets**

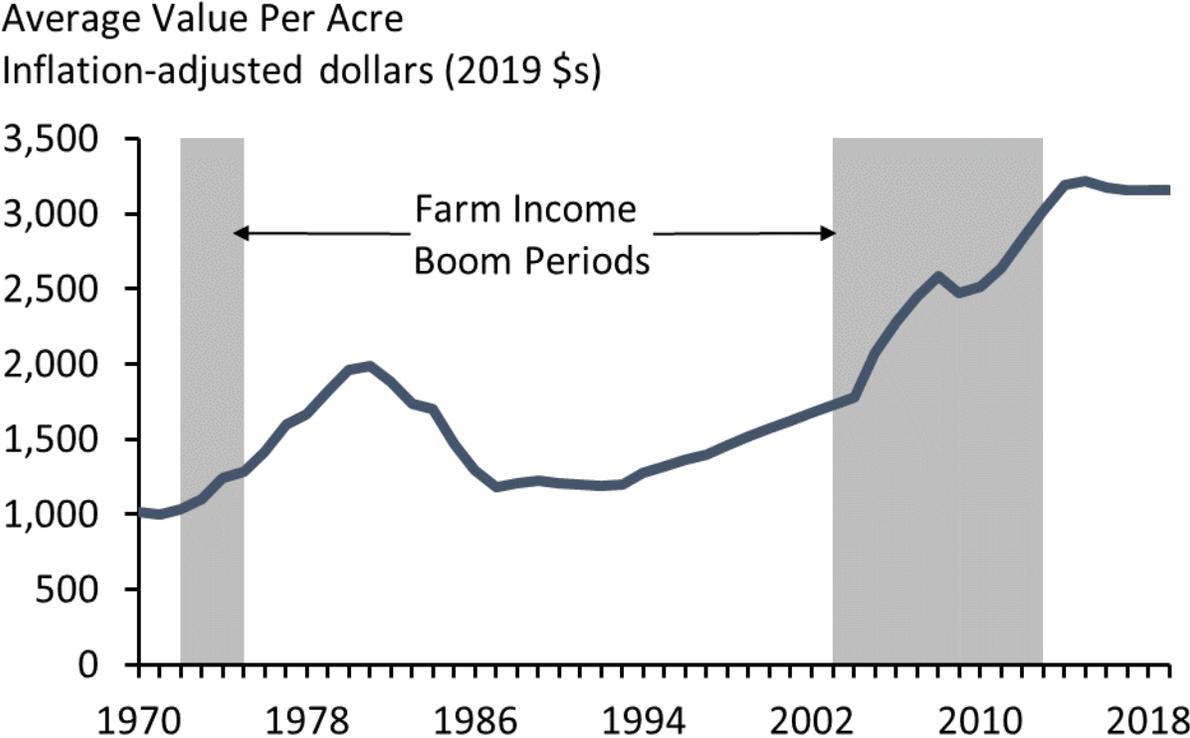

Source: FDIC, farm banks, U.S. (left chart), South Dakota (right chart).

Notes. Data are second-quarter figures from 1986 through 2020. Farm banks are FDIC-insured institutions that have agricultural loans equal to or greater than 25 percent of total loans.

# Farmland equity remains a substantial backstop against credit problems at farm banks.

## No early indications that farmland values are falling.

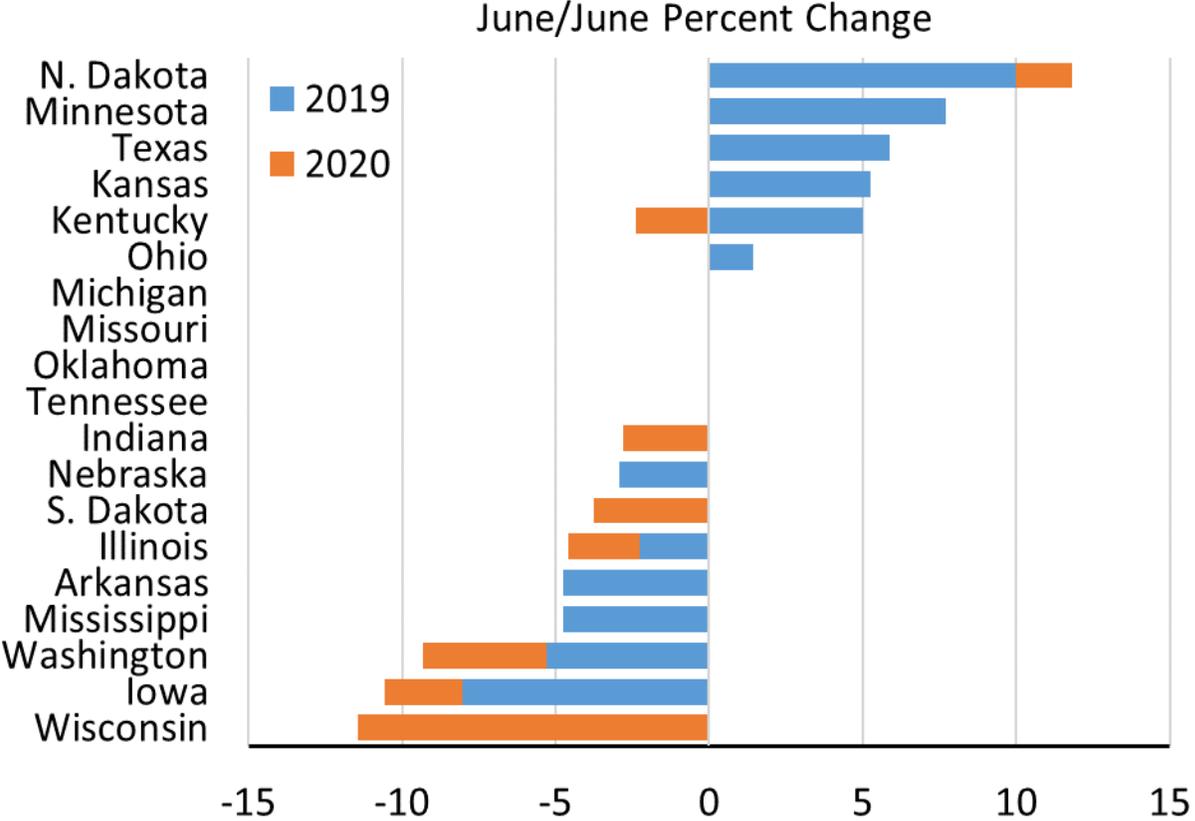

Long-Term Trend in U.S. Farm Real Estate Values

Sources: USDA.

Notes: Figures are as of August 22, 2019, and represent annual average per-acre values of farm real estate in the U.S. through 2019. Farm real estate includes land and improvements.

Current Changes in Farmland Values, 2019 and 2020

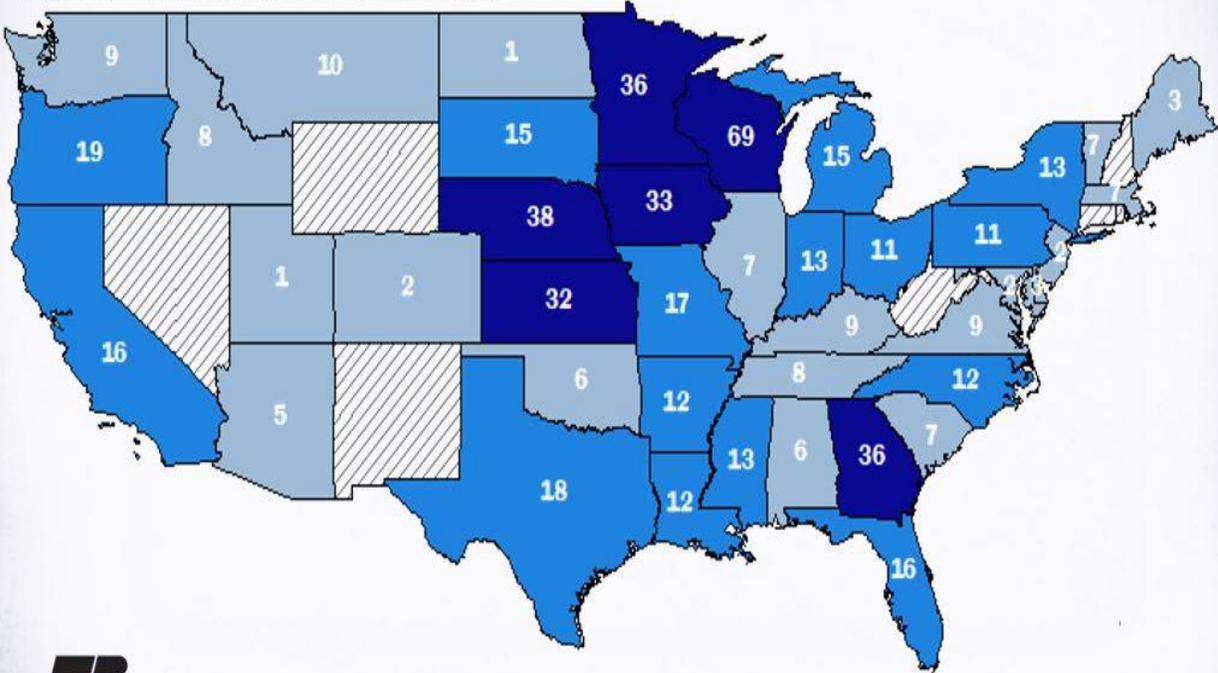

Source: Farmers National Company, June 2020 report.

Notes: Excepting WI, which did not have reported data for 2019, the absence of a bar signifies no change for that period. Some states have had no change in farmland values.

# Strong farmland values have helped keep farm bankruptcy filings low despite struggles in the agriculture sector.

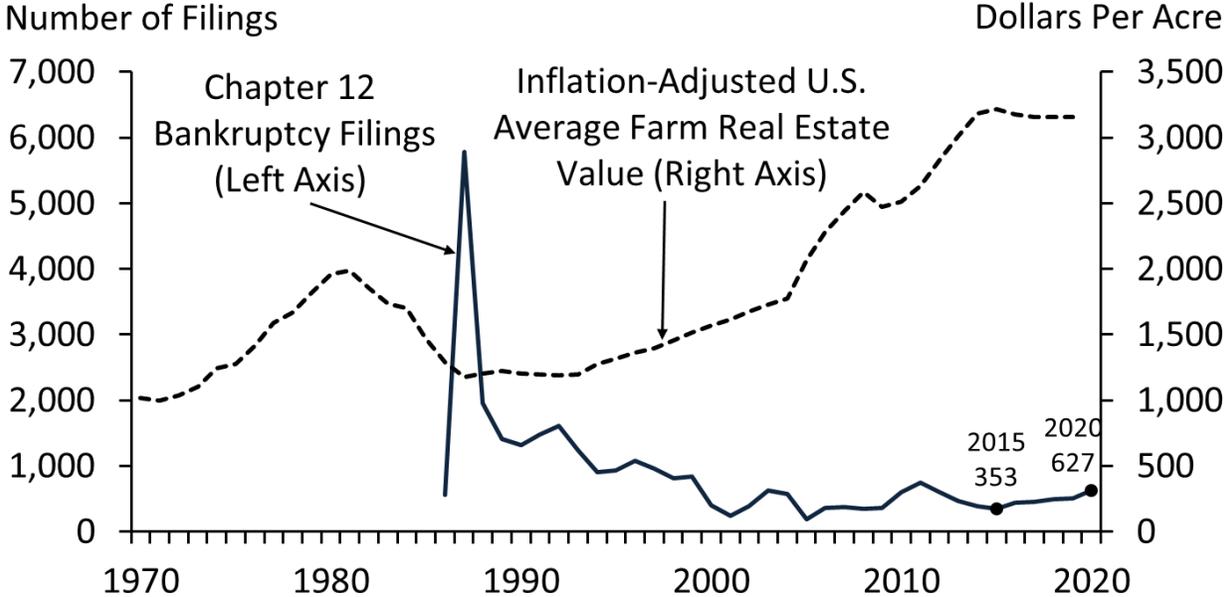

**Figure 2. Chapter 12 Farm Bankruptcies For Last 12 Months**

Chapter 12 Farm Bankruptcies, July 2019 Through June 2020
