

CANVA TUTORIAL

Watch a video
tutorial of using
the Canva app.

wosu.pm/wkcanva

1. Create a New Video

- Open the Canva app on your iPad/tablet.
- Tap Create and choose **Video** (Landscape or YouTube).

2. Explore the Canva Video Workspace

You will see a blank video page thumbnail. Below the thumbnail, you can add images, text, audio and other media tracks.

3. Create a Habitat with AI

- In the left menu, tap “**Magic Media.**”
- Type 4-5 words that describe your creature’s habitat (Ex: desert, hot, rocky, cactus, canyons).
- Tap the desired habitat image thumbnail to add it to the timeline.

4. Upload Your Creature Photo

- Tap “**Uploads**” in the left menu.
- Select “**Upload Files**” and choose a picture of your creature.
- Your uploaded pictures will stay in the “**Uploads**” area while you work.

5. Add and Layer Your Creature

- Tap your creature picture in the “Uploads” area to add it to the project.
- Move the creature onto the habitat background. You will move the creature picture to the track above your habitat.
- Resize and position the creature where it belongs in the scene.

6. Edit Your Creature

- Select the creature picture.
- Use tools such as “Crop”, “Resize”, and “Background Remover” to help the creature blend into its habitat.

7. Record Your Narration

- Tap “Add Audio” (the track below your habitat).
- Select “Record Voiceover.”
- Describe your creature’s habitat, adaptations, and special creature power.

8. Animate Your Creature

- Tap your creature image.
- Select “Animate” and choose an animation style.

9. Preview and Export

- Watch your completed video.
- Make sure it is about 30 seconds long.
- Tap Share>Download>MP4 Video to save your documentary.
