Groundhog's Problem

by Nicholas L.

Date: 4-17-24
The groundhog hit
a giant boulder
Where his house was
going to be.
He tried to move it.
The boulder was too heavy and groundhog couldn't move it.
He tried and tried.

He called his partners.

There were eight partners. His partners tried and tried.
They couldn't move it so they begged a human. The human got a shave...
and got the boulder out. They celebrated!
