

# The Great Computer Challenge, 2025

## *Video Editing, Level 2*

### YOUR CHALLENGE:

---

You have been provided a series of video clips containing b-roll, interviews, music and sound effects. The interviews are provided by conservationist and coastal scientist, Bo Lusk and discusses the history, facts and importance of the eel grass population. Using the art of storytelling and your chosen computer editing software, create a one-minute and thirty second informative video that includes the essential elements of a well-rounded, produced video. Take consideration before beginning your project to view all interviews and b-roll, taking into account the feel, flow and subject matter. Good Luck!

### You must create a video that includes the following items:

---

1. **Psychological continuity** (make sure the video is understandable) and that your video has a smooth intro and close to be considered complete.
2. **Incorporate music/voiceover** that aides in the video excitement, transitions, etc (the music must enhance not compete with the overall promotional video). The music/voiceover will further enhance or heighten the segments within the video. No outside musical source can be used (internet, unauthorized music option such as a CD, MP3 download, etc)  
**\*\*\*recording your own voiceover is not required, but can be used\*\*\***
3. Incorporate **interviews** (from the video B-Roll provided) that will enhance the overall purpose of the promotional video
4. **Graphics** – you are expected to use font (size, style, color), spelling/grammar, etc., that will reinforce the message through words on the screen
5. **Effects** – this will include wipes, patterns, transitions, etc., that will carry the viewer throughout the video (beginning to the middle to the conclusion)
6. **Spelling/Grammar** – use of spelling/grammar to enhance and reinforce the video (key words/titles/etc) must be accurately demonstrated and implemented
7. **No** inclusion of any web accessed or downloaded music and visual effects outside of the editing program.
8. **No** additional technical instruments outside of the editing program (i.e., iphone, Bluetooth, dongle devices, android, tablet, etc) can be used.
9. **When finished you must save your project to the desktop as an MP4 or MOV file and leave your computer open for judging.** If there is a password associated with getting into the computer, please leave on a post-it and visible for the judge to access the project.

## Judging Criteria

The overall evaluation of the final video will be based on the following items:

<b>CRITERIA</b>	<b>EXCELLENT (5)</b>	<b>GOOD (3)</b>	<b>POOR (1)</b>	<b>NONE (0)</b>
Relevance	Video displays complex understanding of the meaning /feeling of theme	Video displays some understanding of the meaning/feeling of the theme	Video displays little understanding of the meaning/feeling of the theme	Video displays no understanding of meaning/ feeling of the theme
Psychological Continuity/ Mood	Demonstrates exceptional understanding, comprehension and mood of video	Demonstrates adequate understanding, comprehension and mood of video	Demonstrates little understanding, comprehension and mood of video	Demonstrates no understanding, comprehension and mood of video
Transitions	Transitions are smooth and complement the Video composition	Transitions are somewhat smooth with a few distractions	Transitions distract from the flow of the video composition	There were no recognizable/visible transitions
Spelling/ Grammar	Spelling/grammar was exceptionally displayed (creative/no errors)	Spelling/grammar was adequately displayed (creative/no more than two mistakes)	Spelling/grammar was poorly displayed (lack of creativity; more than two mistakes)	Spelling/grammar was inaccurate/nonexistent
Music/ Audio	Music/audio effectively complement the composition/energy of the video	Music/audio adequately complement the composition/energy of the video	Music/audio distract and/or does not compliment/energize the video	Music/audio were not implemented or were not provided in an audible manner
Interviews	Placement/length/ relation of interviews was effectively demonstrated	Placement/length/ relation of interviews was adequately demonstrated	Placement/length/ relation of interviews were minimally demonstrated	Placement /length/ relation of interviews were not implemented/ provided/included
Graphics	Placement/creativity/ color effectiveness was effectively used and enhances the video composition	placement/creativity/ color effectiveness was adequately used and enhances the video composition	placement/creativity/ color effectiveness was distracting and did not enhance the video composition	placement/creativity/color effectiveness was not incorporated in an attempt to complement the video composition
Effects	Incorporation/timing/ selection effectively compliments the video transition	Incorporation/timing/ selection adequately compliments the video transition	incorporation/timing/ distracts and/or hinders the video transition	incorporation/ timing/ was not utilized

***Have fun and thank you for participating in the  
Great Computer Challenge, 2025!***
