

The Ladybug with 7 Spots

Written and Illustrated By

Amrita C

Once upon a time there was a ladybug named Holly. She lived in Bug Village with the other bugs. Holly was a happy little ladybug with 7 beautiful spots.

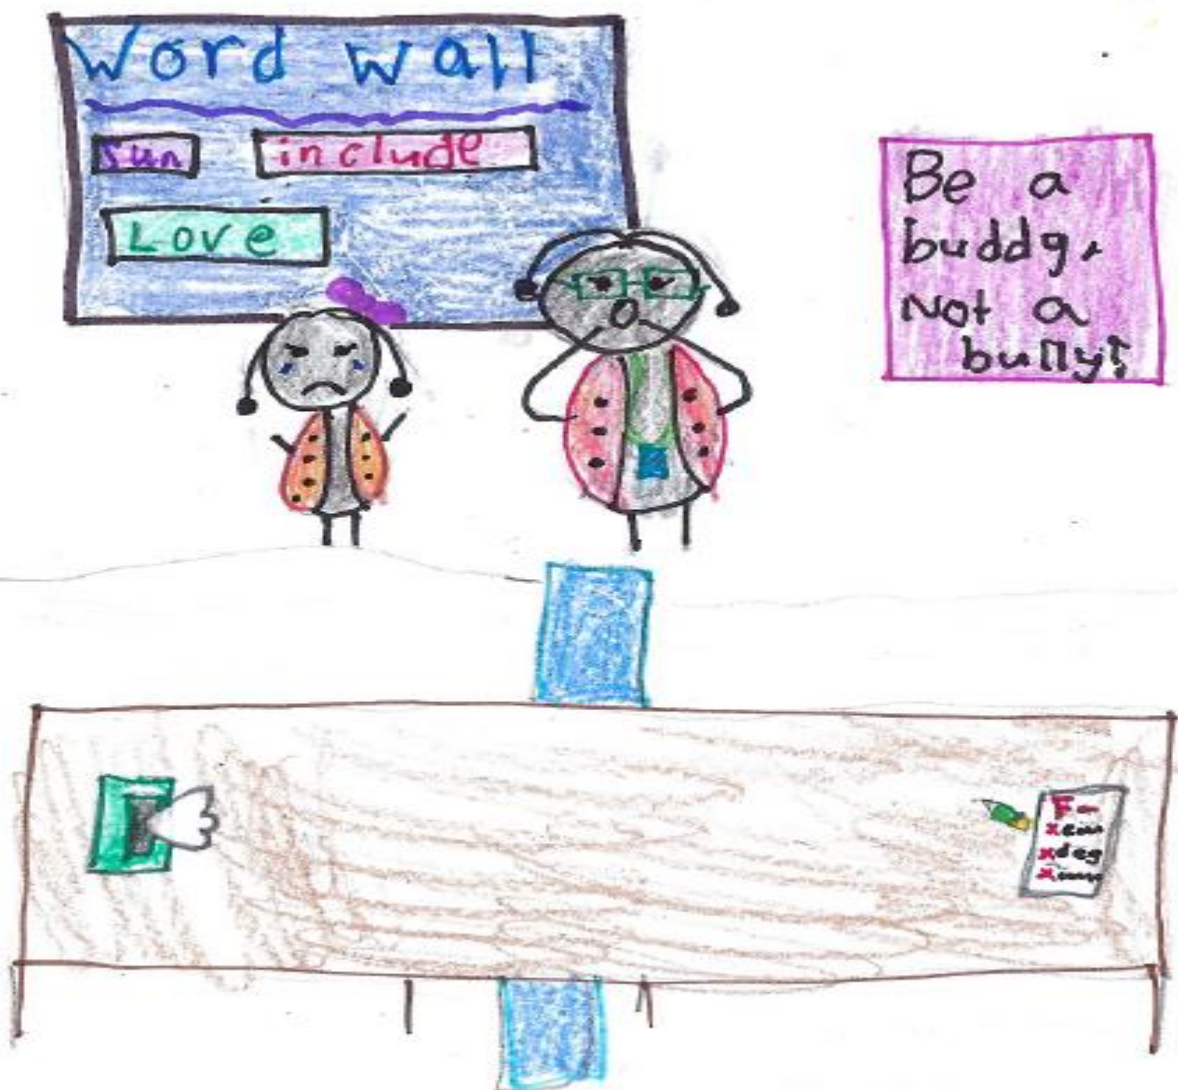

One day Holly went to Daisy's School for Ladybugs. The ladybugs in her class were teasing and making fun of her because she had an odd number of spots.

Holly felt very sad, and she told her teacher.

"Mrs. Lila, the other ladybugs are teasing me because I have an odd number of spots!"

Mrs. Lila looked at Holly's spots and smiled.

She said, "Just like snowflakes, every bug is different which makes them special."

Holly smiled and felt happy again about her spots. She had a great day in school and was excited to come back tomorrow.

Everyone is special and different !!

All about the author

Hi, I am Amrita C and I am 7 years old.

I am doing this story because I like ladybugs.

Ladybugs can be in different colors like orange, purple, and red.

My favorite color is pink, and my room is also pink.

I like to draw, play with my older sister and I like to read books.

My favorite book is Babysitters Little Sister, because they have colorful pictures and are funny.
