

The Human Face of Big Data

During the first day of a baby's life, the amount of data generated by humanity is equivalent to 70 times the information contained in the Library of Congress. What will it mean to live in a world where every moment, from birth to death, is digitally chronicled and preserved in vast cloud-based databases, forever?

Murder of a President

Based on Candice Millard's best-seller *Destiny of the Republic*, "Murder of a President" on **American Experience** is the story of James A. Garfield, one of the most extraordinary men ever elected president, his shooting by a deluded madman named Charles Guiteau, and its bizarre and tragic aftermath.

On July 2nd, 1881, just four months after Garfield took office, Guiteau fired two bullets at the president in a Washington, D.C. train station. The first bullet sliced through the president's right arm; the second ripped into his back. Guiteau was immediately arrested.

Amazingly, Garfield survived, and for the next 79 days, the nation held its breath while his medical team and others worked around the clock to save him—including Alexander Graham Bell (the recent inventor of the telephone) who worked desperately to invent the first metal detector, a device capable of finding the bullet.

As Garfield fought for his life, his medical team—led by the questionable Dr. Doctor Bliss—administered archaic and unsanitary measures, rejecting the method of antisepsis that had been recently discovered, and interfering with the metal detector tests, fearing they would reveal that the bullet was lodged in a place other than where Bliss had indicated. Garfield died on September 19th, 1881.

Garfield had grown up in terrible poverty and rose to the Presidency on the sheer force of his personality and intellect. He believed that all Americans should have the same opportunity to succeed, and that it was government's responsibility to help them get that. When Garfield died, "...that dream, the dream for which the Union had fought, that vision died," says historian Heather Cox Richardson.

American Experience "Murder of a President" airs Tuesday, the 2nd at 8:00 p.m. and Sunday, the 7th at 10:00 p.m. On HD3-1, it airs Tuesday, the 2nd at 7:00 p.m. and Wednesday, the 3rd at 7:00 a.m. and 1:00 p.m.

Perfect Crime

When Nathan Leopold (right) and Richard Loeb (left), two wealthy, well educated college students from Chicago, con-

fessed to the murder of 14-year-old Bobby Franks, the story made headlines across the country. It was all part of a scheme the pair had devised to get away with "the perfect crime." The case unfolded during the summer of 1924, with famed defense attorney Clarence Darrow and Cook County

Prosecutor Robert Crowe debating the death penalty.

When Frank's body was found, police had few clues—only a pair of eyeglasses found near the body and a cruel ransom note sent to Frank's parents after Bobby was already dead. Investigators soon traced the glasses to 19-year old Nathan Leopold, who stated that on the night of the murder, he was with his friend, Richard Loeb, the 18-year old son of a wealthy Sears and Roebuck vice president. It didn't take long for investigators to find evidence discrediting the boys' alibi and to match the lettering on the ransom note to Leopold's typewriter.

Prosecutor Crowe immediately demanded the death penalty. Clarence Darrow, who had been hired by the families to defend Leopold and Loeb, was faced with a nearly impossible task—to save the lives of two remorseless killers who had admitted their guilt.

In an epic-closing argument, Darrow spoke extemporaneously for three days, imploring the judge to spare the boys' lives while making an impassioned argument against the death penalty.

"Perfect Crime" on **American Experience** airs Tuesday, the 9th at 8:00 p.m. and Sunday, the 14th at 10:00 p.m. On HD3-1, it airs Tuesday, the 9th at 7:00 p.m. and Wednesday, the 10th at 7:00 a.m. and 1:00 p.m.

The Human Face of Big Data

Nearly everything we do today leaves an indelible digital trail: Where we live. What we search. What we read. Where we go. What we buy. What we say. All of this data is being recorded and stored.

The rapid emergence of inter-connected data devices and the massive gathering and analyzing of real-time data are helping to create a central planetary nervous system in which individuals have become human sensors, helping map and measure the planet while, at the same time, mapping intimate details of the lives of each and every one of us. In the technology industry, this phenomenon is commonly known as "Big Data," a word that was barely used a few years ago, but that now governs the day for many of us from the moment we awaken to the extinguishing of the bedside light bulb.

Every two days the human race is now generating as much data as was generated from the dawn of humanity through the year 2003. Today, individuals in the world's major cities are exposed to as much information in a single day as their 15th–century ancestors were exposed to in a lifetime. With phones and a multitude of devices serving as the "on-ramp" for billions of people to access the information network, technology has fundamentally changed the way people interact with everything.

The Human Face of Big Data examines the promises and perils of this unstoppable force that is now invisibly sweeping through our lives and is expected to have an impact on humanity and civilization 1,000 times greater than the internet itself. This film features stunning real-time visualization of data, using state-of-the-art animation and graphics that illustrate the info streaming in from satellites, billions of sensors, and GPS-enabled cameras and smart phones. The spectacular images allow us to view how complex systems function to understand aspects of our existence in ways previously unimaginable.

The film also includes conversations with 30 leading voices in the fields of data science, artificial intelligence, and technical and digital medicine. It offers a multitude of personal examples to put a human face on Big Data—including several breakthroughs in health—and reveals how collecting and mapping data on the ground can help us understand areas stuck in cycles of poverty, crime, famine, and political upheaval.

It also explores our vulnerabilities in the new cyber era, spotlighting issues of personal privacy, government surveillance, and civil liberties, and the implications for the future of democracy when people's lives are chronicled and exposed to known and unknown entities.

The Human Face of Big Data will be broadcast Wednesday, the 24th at 9:00 p.m. and Sunday, the 28th at 10:00 a.m./10:00 p.m. On HD3-1, it airs Wednesday, the 24th at 7:00 p.m. and Thursday, the 25th at 7:00 a.m. and 2:00 p.m.

Memory Hackers

Memory. Whether it's sharp or fuzzy, it's the glue that binds our mental lives. Without it we'd be prisoners of the present, unable to use the lessons of the past to change our future. Memory represents who we are. But how does it work?

In "Memory Hackers," Nova reports that for the first time, neuroscientists are exploring the precise molecular mechanisms of memory. By studying individuals ranging from an 11-year old whiz-kid who remembers every detail of his life to a woman who even had memories implanted, scientists have uncovered a provocative idea.

For much of human history, memory has been seen as a tape recorder that faithfully registers information and replays it back intact. But now, researchers are discovering that memory is far more malleable, always being written and rewritten, not just by us but by others.

"Memory Hackers" on Nova airs Wednesday, the 10th at 8:00 p.m., Saturday, the 13th at 10:00 p.m., and Sunday, the 14th late night at 12:00 midnight. On HD3-1, it airs Thursday, the 11th at 12:00 noon, Friday, the 12th at 8:00 p.m., Saturday, the 13th at 11:00 p.m., and Sunday, the 14th at 4:00 p.m.

Iceman Reborn

Murdered more than 5,000 years ago, Otzi the Iceman is the oldest human mummy on Earth. Miraculously preserved in glacial ice, the intact remains of this Neolithic European hunter continue to provide scientists, historians, and archeologists with groundbreaking discoveries about a crucial time in human history. But in order to preserve it, this extraordinary body has been locked away, out of reach, in a frozen crypt—until now.

"Iceman Reborn" on Nova joins renowned artist and paleo-sculptor Gary Staab as he has been granted rare access into the Iceman's frozen lair. Gary has been charged with creating an exact replica of the body, which scientists and the public alike can then study up close and in person. As we see the Iceman brought to life from 3D printing, resin, clay, and paint, new revelations about Otzi's life and legacy come to light.

"Iceman Reborn" on Nova can be seen Wednesday, the 17th at 8:00 p.m., Saturday, the 20th at 10:00 p.m., and Sunday, the 21st late night at 12:00 midnight. On HD3-1, it airs Thursday, the 18th at 12:00 noon, Friday, the 19th at 8:00 p.m., Saturday, the 20th at 11:00 p.m., and Sunday, the 21st at 4:00 p.m.

Rise of the Robots

Machines are everywhere. They run our factory assembly lines and make our coffee. But Robots—machines with human-like capabilities—have long been the stuff of science fiction. Until now. Fueled by an ambitious DARPA (Defense Advanced Research Projects Agency) challenge, the race is on to design a robot that can replace humans in disaster relief situations.

"Rise of the Robots" on Nova follows the robots—and the engineers that program them—as they strive to make their way out of the lab and into the real world. But how capable are they, really? How close are we to a future where humanoid robots are part of our everyday lives? And what are the implications of a future with robots that can do a human's job?

Nova investigates the cutting-edge technologies that are advancing robotics as never before.

"Rise of the Robots" on Nova airs Wednesday, the 24th at 8:00 p.m., Saturday, the 27th at 10:00 p.m., and Sunday, the 28th late night at 12:00 midnight. On HD3-1, it airs Thursday, the 25th at 12:00 noon, Saturday, the 27th at 11:00 p.m., and Sunday, the 28th at 4:00 p.m.

[I]NDEPENDENT LENS

A Ballerina's Tale

"A Ballerina's Tale" on Independent Lens follows the journey of Misty Copeland, from the triumph of Firebird to her return to the American Ballet Theatre stage.

Misty Copeland's career shines a light on the absence of women of color at major ballet companies, and how classical ballet's emphasis on skinny bodies for ballerinas impacts the health of professional dancers. Misty, because of her race and her curves, is central to both issues in the classical dance world.

The film climaxes with a landmark performance by Misty in Swan Lake, the fulfillment of the dream of many to see a true black swan at a mainstream international company. "A Ballerina's Tale" is the story of how great talent, a powerful will, and the support of a network of mentors can open doors within a very cloistered world.

"A Ballerina's Tale" on **Independent Lens** airs Monday, the 8th at 9:00 p.m. and Sunday, the 14th at 7:00 p.m. On HD3-1, it airs Monday, the 8th at 7:00 p.m. and Tuesday, the 9th at 7:00 a.m. and 2:00 p.m.

T(ERROR)

"T(ERROR)" on Independent Lens, winner of a 2015 Sundance Film Festival Special Jury Prize, is the first documentary to place filmmakers on the ground during an active FBI counter-terrorism sting operation. Unfolding with the drama of a spy novel, the film is the story of "Shariff," a 63-year-old Black revolution-

Khalifah Al-Akili was class-

ary turned informant, whose perspective provides a glimpse of the government's counter-terrorism tactics and the sometimes murky justifications behind them. "(T)ERROR" begins in the eastern United States, where Shariff works as a

ing camp abroad. As time goes by, Shariff finds himself under increasing pressure from the FBI to produce results in the Al-Akili case. Then a dramatic discovery upends the investigation and raises serious questions about the ethics and effectiveness of the FBI's tactics.

dred thousand dollars. The FBI orders him to befriend a white Muslim convert named Khalifah Al-Akili, and to assess his interest in attending a terrorist train-

Stark and controversial, "(T)ERROR" illuminates the fragile relationships between individuals and the surveillance state in modern America, and asks: Who is watching the watchers?

"(T)ERROR" on Independent Lens will be broadcast Monday, the 22nd at 9:00 p.m. On HD3-1, it airs Monday, the 22nd at 7:00 p.m. and Tuesday, the 23rd at 7:00 a.m. and 2:00 p.m.

Moose: Life of a Twig Eater

High up in Canada's Rockies, by a crystal-clear lake rimmed with old-growth forest, a moose is born. At the best of times, the odds are stacked against this leggy 35-pounder surviving its first year; normally less than 50% do. With populations across parts of North America in steep decline, scientists believe one of the reasons is that fewer moose calves are surviving their first year. It's never been more important to understand what happens in the first year of a moose's life.

Filmed over 13 months in the wilds of Jasper National Park, "Moose: Life of a Twig Eater" on **Nature** takes us inside the world of moose to experience a mother's love and a calf's first year of life up close.

"Moose: Life of a Twig Eater" airs Wednesday, the 10th at 7:00 p.m. and Saturday, the 13th at 11:00 p.m. On HD3-1, it airs Wednesday, the 10th at 9:00 p.m., Thursday, the 11th at 6:00 a.m. and 1:00 p.m., and Sunday, the 14th at 3:00 p.m. and 6:00 p.m.

Raising the Dinosaur Giant

A few years ago in the Argentinean desert, a shepherd was searching for one of his lost sheep when he spotted the tip of a gigantic fossil bone sticking out of a rock. When the news reached paleontologists at the MEF Museum in Trelew, Argentina, they set up camp at the discovery site to examine it and look for more bones. By the end of the dig, they had uncovered more than 200 other huge bones.

As "Raising the Dinosaur Giant" on **Nature** reveals, these fossils came from seven dinosaurs, all belonging to a new species of giant plant-eating titanosaur whose name will be announced soon. Host Sir David Attenborough takes viewers through the twists and turns of the forensic investigation to find out more about this new animal.

"Raising the Dinosaur Giant" on **Nature** airs Wednesday, the 17th at 7:00 p.m. and Saturday, the 20th at 11:00 p.m. On HD3-1, it airs Wednesday, the 17th at 9:00 p.m., Thursday, the 18th at 6:00 a.m. and 1:00 p.m., and Sunday, the 21st at 3:00 p.m.

Snow Chick

From the filmmakers who brought viewers the spectacular "Penguins: Spy in the Huddle," comes this intimate journey of one vulnerable and charismatic Emperor penguin chick, from the moment he emerges from the egg to the moment he leaves for the sea as a boisterous adolescent.

"Snow Chick" on **Nature** begins with his father, who's left holding the baby through the long Antarctic winter while his mother is 50 miles away catching fish to feed him. Mom and Dad swap responsibilities until the chick is big enough to take his first steps. His new-found independence in this extraordinarily difficult place is filled with humor and danger that will test his parents until the day he leaves them and makes the long trek to the sea without them to begin life on his own.

"Snow Chick" on **Nature** can be seen Wednesday, the 24th at 7:00 p.m. and Saturday, the 27th at 11:00 p.m. On HD3-1, it airs Wednesday, the 24th at 9:00 p.m., Thursday, the 25th at 6:00 a.m. and 1:00 p.m., and Sunday, the 28th at 3:00 p.m.

Johnny Cash's Bitter Tears

Johnny Cash's Bitter Tears tells the story behind Cash's largely unknown 1964 album, *Bitter Tears*, a moving tribute to the Native American experience.

Amid the social and political upheavals of the decade, Cash was one of the first white artists who hoped to raise awareness about the disenfranchisement and suffering of Native peoples through folk protest songs, including "The Ballad of Ira Hayes." Hayes was a Native American WWII hero who was immortalized in the famous flag-raising Iwo Jima photograph, only to die back home, impoverished on a reservation.

The album was ignored by mainstream press at the time, and Cash and Columbia Records took out a full page ad in Billboard challenging his critics for refusing to play it.

Fifty years later, artists Emmylou Harris, Kris Kristofferson, and more come together to pay their own tribute to Cash, these extraordinary songs, and Native Americans.

Johnny Cash's Bitter Tears airs Monday, the 1st at 9:00 p.m. and Tuesday, the 23rd at 10:00 p.m. On HD3-1, it airs Wednesday, the 10th at 7:00 p.m. and Thursday, the 11th at 7:00 a.m. and 2:00 p.m.

CPR in AmericaA Second Opinion Special

CPR in America, an hour-long **Second Opinion Special**, sets out to do something no television show has ever done—teach as many people as possible the life-saving skill of Hands-Only CPR.

Each year, more than 326,000 out-of-hospital cardiac arrests occur in the United States, and 90% of those people die. Survival rates can double or triple if the victim receives CPR right away. Yet, 70% of Americans feel helpless to act during a cardiac emergency because they don't know how to administer CPR or they're afraid of hurting the victim. But, a 2012 study showed that people who view a Hands-Only CPR demonstration are significantly more likely to deliver lifesaving chest compressions.

CPR in America provides easy to understand Hands-Only CPR demonstrations and shares interviews with the doctors involved in writing the new guidelines. It also features documentary-style survivor stories of three families whose lives were drastically changed by a cardiac event.

CPR in America can be seen Wednesday, the 10th at 9:00 p.m.

David Bowie: Five Years

David Bowie: Five Years is an intimate film spanning five key years (1969–1973) in Bowie's music career. The film features

a wealth of unseen footage and charts the star's continual evolution through various roles, making him an icon of our times.

This portrait also explores Bowie's regeneration in Berlin, and his numerous critical triumphs, and includes interviews with all of his closest collaborators.

David Bowie: Five Years can be seen Friday, the 12th at 9:00 p.m. On HD3-1, it airs Saturday, the 13th at 8:00 p.m.

Programming Note for Downton Abbey Fans

PBS in Arlington, VA has announced that the final 9th episode of **Downton Abbey 6** will be broadcast Sunday, March 6th, not Sunday, February 28th where it would normally fall. This means there will be a two-week gap between episode 8, airing on February 21st, and the final episode to be broadcast on March 6th.

B.B. King

B.B. King, born Riley B. King, was one of the most influential and celebrated blues musicians of all time. From his roots as a sharecropper's son, working in the cotton fields of Mississippi, he rose to become a living legend—the most renowned blues singer, songwriter, musician, and record producer of the past 40 years—earning the moniker 'King of the Blues'. King's story of struggle and triumph is chronicled in **American Masters** "B.B. King: The Life of Riley," narrated by Academy Award-winning actor Morgan Freeman.

"B.B. King" on **American Masters** will be broadcast Monday, the 29th at 9:00 p.m. On HD3-1, it airs Saturday, the 13th at 7:00 p.m. on KENW-TV.

Fats Domino

Fats Domino's record sales during the 1950s were rivaled only by Elvis Presley. With his boogie-woogie piano playing rooted in blues and jazz, he became one of the inventors, along with Presley, Chuck Berry, and Jerry Lee Lewis of a revolutionary genre of music, rock 'n' roll.

In celebration of Fats Domino's 88th birthday, **American Masters** presents, "Fats Domino and the Birth of Rock 'n' Roll," that traces how Fats Domino's brand of rhythm and blues morphed into rock and roll, appealing to black and white audiences alike.

"Fats Domino and the Birth of Rock 'n' Roll" on **American Masters** can be seen Sunday, the 28th at 7:00 p.m. On HD3-1, it airs Saturday, the 27th at 8:00 p.m.

Locked Out: The Fall of Massive Resistance

In 1958, the Commonwealth of Virginia led other Southern states in refusing the U.S. Supreme Court's mandate to integrate its public schools in the aftermath of the Brown v. Board of Education decision. Several counties "locked down" or closed their public schools altogether—one for as long as five years—rather than allow black students into all-white schools.

Locked Out: The Fall of Massive Resistance sheds light on this dark moment in history through interviews, academic commentary, and archival footage from the era. The documentary also offers first-hand accounts from African-American students who found themselves on the front lines of this desegregation battle.

Locked Out: The Fall of Massive Resistance airs Tuesday, the 2nd at 10:00 p.m. and Thursday, the 4th at 7:00 p.m.

The Powerbroker: Whitney Young's Fight for Civil Rights

Whitney M. Young, Jr. was one of the most celebrated — and controversial—leaders of the civil rights era. "The Powerbroker: Whitney Young's Fight for Civil Rights" on **Independent Lens** follows his journey from segregated Kentucky to head of the National Urban League.

Young was one of the few African Americans who had the ears of those who controlled the levers of power: Fortune 500 CEOs, governors, senators, and three presidents. He used these relationships to gain better access to employment, education, housing, and healthcare for African Americans, other minorities, and those in need.

The Powerbroker: Whitney Young's Fight for Civil Rights" on **Independent Lens** will be broadcast Monday, the 15th at 9:00 p.m. On HD3-1, it can be seen Monday, the 15th at 7:00 p.m. and Tuesday, the 16th at 7:00 a.m. and 2:00 p.m.

The Black Panthers: Vanguard of The Revolution

Change was coming to America and the fault lines could no longer be ignored—cities were burning, Vietnam was exploding, and disputes raged over equality and civil rights. A new revolutionary culture was emerging and it sought to drastically transform the system. The Black Panther Party for Self-Defense would, for a short time, put itself at the vanguard of that change.

"The Black Panthers: Vanguard of The Revolution" on **Independent Lens** is the first feature-length documentary to explore the Black Panther Party, its significance to the broader American culture, its political awakening for black people, and the painful lessons wrought when a movement derails.

"The Black Panthers: Vanguard of The Revolution" on **Independent Lens** airs Tuesday, the 16th at 8:00 p.m. On HD3-1, it airs Tuesday, the 16th at 7:00 p.m. and Wednesday, the 17th at 7:00 a.m. and 1:00 p.m.

Smithsonian Salutes Ray Charles

In Performance at the White House presents "Smithsonian Salutes Ray Charles," an all-star music special from the East Room of the White House honoring the music of Ray Charles. The incomparable Charles influenced and crossed every genre of American music.

The special features interpretations of Charles' music, utilizing his own big-band musical arrangements, with performances

by renowned as well as up and coming artists.

"Smithsonian Salutes Ray Charles" on In Performance at the White House will be broadcast Friday, the 26th at 9:00 p.m. and Sun-

day, the 28th at 9:00 p.m. On HD3-1, it will be broadcast Saturday, the 27th at 7:00 p.m. on KENW-TV.

Caged Bird: Life and Music of Florence B. Price

Born in 1887, Florence B. Price became the first African-American woman to have her music performed by a major symphony orchestra when the famous Chicago Symphony—composed entirely of white men premiered her Symphony in E minor at the

1933 World's Fair. Even today this would be a huge achievement for any composer, but at the time it was entirely without precedent.

Price was a favorite of the great singer Marian Anderson, who sang Price's music at her legendary Lincoln

Memorial performance in 1939.

Caged Bird: Life and Music of Florence B. Price traces Price's life, detailing her cultured childhood in a gifted family and her triumph over prejudice. Her remarkable achievements during the racist "Jim Crow" era were a testament to her great gift.

Caged Bird airs Sunday, the 21st at 7:00 p.m. On HD3-1, it airs Monday, the 8th at 8:00 p.m. and Tuesday, the 9th at 8:00 a.m. and 3:00 p.m.

KENW Public Radio Membership Drive February 6th-13th

On Saturday, February 6th, our KENW Public Radio Network Membership Drive begins.

It's a little hard to believe, but KENW Public Radio has had a presence on the High Plains of Eastern New Mexico and West Texas for almost 50 years now. Its success in continuing to keep listeners in our area informed and entertained during this time can be attributed, in part, to a handful of devoted staff members, but the real heroes are you, our listeners. One listener, one contribution at a time—that may not sound like much, but when it comes to Public Radio, that *one* is nothing less than the very key to KENW-FM's ability to endure over the decades.

Our goal during this drive is \$18,000.

You can make a pledge by calling (575) 562-2112, toll free at 1-888-367-5369 or online at kenw.org.

We hope that you will consider a pledge in support of the particular program(s) you look forward to each day.

Thank you.

PRESCRIPTION DRUG ADDICTION

PRESCRIPTION DRUG ADDICTION focuses on the runaway opioid epidemic in the United States. Michael Botticelli, Director of the White House Office of National Drug Control Policy, speaks to host Dennis Wholey about prescription drug and heroin addiction and warning signs for family members. Four medical experts discuss the past year's 23,000 opioid deaths as well as addiction and treatment.

"Chasing Heroin" on FRONTLINE

Facing a heroin epidemic, America is experimenting with radical new approaches to the drug problem. "Chasing Heroin," a two-hour FRONTLINE, follows several addicts to examine U.S. drug policy and what happens when heroin is treated like a public health crisis, not a crime.

Tuesday, the 23rd at 8:00 p.m. Thursday, the 25th at 7:00 p.m.

Wednesday, the 24th at 12:00 noon (3-1) Friday, the 26th at 8:00 p.m. (3-1)
