|--|------|------|--|-----|--|--|--|

- \* NOAA / NWS is not required to transmit an RWT. Other alerts sent during the same period may verify reception.  
Input to the ENDEC should be checked to verify NOAA audio is present.
- \*1 No test or other EAS activity was received from KOWB for this week. The cause of the discrepancy has yet to be determined.  
A check of the KOWB receiver audio shows it is present at the ENDEC monitor input at a level sufficient to be decoded.
- \*2 No test or other EAS activity was received from KOWB for this week. The reason for the problem has not been ascertained.  
A check of the KOWB receiver audio shows it is present at the ENDEC monitor input at the level needed to decode.
