	Week		Sent		LP1	NWS	IPAWS			

- \* NOAA/NWS is not required to transmit an RWT. Other alerts sent during the same period verify reception. If none are received during the period, NOAA audio input to the ENDEC should be checked to verify its presence.
  - \*1 The LP-1 did not send an RMT or RWT for the reporting period.
  - \*2 Due to an equipment failure with the LP-1, the EAS test (an RMT event) was not transmitted successfully.
  - \*3 No EAS test was received from the LP-1 for this period. Audio for the assigned source is present on the Monitor 1 input to the ENDEC and at the correct level. Cause of the failure cannot be determined at this point. Subsequent testing is scheduled to be conducted.
  - \*4 Scheduled data network reconfiguration at the studio affecting all internal and Internet access was conducted during the period of 22:00 13 May 2018 through 13:00 14 May 2018. This affected IPAWS CAP originated messages. NOAA NWS messages received from WXM37 and PEP connectivity into the facility conveyed by the NPR Squawk Channel were not affected.
- 

- \*5 Addendum to entry \*4; ENDEC equipment was out of service during the reconfiguration.  
Full operation was restored by 23 May 2018. No EAS RWT event was originated by this service nor the LP-1 for this period.
- \*6 No Required Monthly Test nor Required Weekly Test was originated by the LP-1 for this period. The Required Monthly Test originated on 8/6/18 at 10:00:50 by Albany County Civil Authorities serves as an alternative test for the system. Because of the timing, the RMT was received from KUWR before the CAP polling mechanism. The test was relayed as required by rule 47 CFR 11.61 (a) (1) (i).

The individual log for KUWL / KUWY/KUWR-HD2/KUWR-HD3/ has been checked and cross-referenced for accuracy.

This summary (with comments) and accompanying information is located / detailed here:

<http://wyomingpublicmedia.org/station-eas-operational-log>

It has been checked and verified as accurate. A signed/dated copy of this document is maintained in the Wyoming Public Media Engineering Core area - Room 74, Knight Hall, University of Wyoming Campus.
