

EAS Log Addendum  
9 February, 2015

The NOAA/NWS did not issue an RWT event for the period from 1 February through 7 February, 2015. A WSA event was sent that week. The NOAA office is not required to issue an RWT for any week that other alert events are issued, which suffice to demonstrate system functionality. A check of the ENDEC showed NOAA audio at the appropriate input, so connectivity has been determined to be correct.
